
Background

Representing the interests of health plan members, the California Center for Data Insights and Innovation Office of the Patient Advocate (CDII/OPA) publicly reports on health care quality. CDII/OPA published its first HMO Health Care Quality Report Card in 2001 and has since annually updated, enhanced, and expanded the Report Cards on HMOs, PPOs and Medical Groups. The current version (2023-24 Edition) of the online Health Care Quality Report Cards is available at https://www.cdii.ca.gov/consumer-reports/.

Performance results are reported at a health plan reporting unit level in the Health Plan Report Cards. Ten (10) participating health plans report HMO Consumer Assessment of Healthcare Providers and Systems (CAHPS®²) results.

- Aetna Health of California, Inc.*
- Anthem Blue Cross of California*
- Blue Shield of California*
- CIGNA HealthCare of California, Inc.*
- Health Net of California, Inc.*
- Kaiser Foundation Health Plan of Northern California, Inc.
- Kaiser Foundation Health Plan of Southern California, Inc.
- Sharp Health Plan
- United Healthcare of California, Inc.
- Western Health Advantage

*Plans with an asterisk report HMO/POS combined.

Six (6) participating health plans report PPO Consumer Assessment of Healthcare Providers and Systems (CAHPS®) results.

- Aetna Life Insurance Company of California**
- Anthem Blue Cross of California**
- Blue Shield of California
- CIGNA Health and Life Insurance Company of California**
- Health Net Life Insurance Company of California**
- United Healthcare Insurance Company of California***

**Plans with two asterisks report PPO/EPO combined.
***Plans with three asterisks report POS/PPO combined.

Sources of Data for California Health Care Quality Report Cards

The 2023-24 Edition Report Cards, released in the Fall 2023 and Spring 2024, use data reported in Reporting Year (RY) 2023 for performance in Measurement Year (MY) 2022. Data sources are:

1. The National Committee for Quality Assurance’s (NCQA) publicly reported Consumer Assessment of Healthcare Providers and Systems (CAHPS) commercial measure data and HMO and PPO Healthcare Effectiveness Data and Information Set (HEDIS ³). (HEDIS Methodology Description in a separate document)

3. The Purchaser Business Group on Health (PBGH) Patient Assessment Survey’s (PAS) patient experience data for medical groups.

Health Plan CAHPS Methodology Process

Methodology Decision Making Process

CDII/OPA conducts a multi-stakeholder process to determine the best scoring methodology for capturing patient experience appropriately and accurately. Beginning with the 2013 Edition of the Report Cards, CDII/OPA enhanced its partnership with IHA’s AMP program such that IHA’s Technical Measurement Committee (TMC) serves as the primary advisory body to CDII/OPA regarding methodologies for the HMO and PPO Report Cards for both HEDIS clinical and CAHPS patient experience data and the Medical Group Report Card clinical data. Comprised of representatives from health plans, medical groups and health care purchaser organizations, TMC members are well-versed in issues of health care quality and patient experience measurement, data collection and public reporting. CDII/OPA’s Health Care Quality Report Cards are a standing item at the TMC meetings.

³ HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA). HEDIS is a source for data contained in the California Health Care Quality Report Cards obtained from Quality Compass®2023 and is used with the permission of the National Committee for Quality Assurance (NCQA). Quality Compass 2023 includes certain CAHPS data. Any data display, analysis, interpretation, or conclusion based on these data is solely that of the authors, and NCQA specifically disclaims responsibility for any such display, analysis, interpretation, or conclusion. TMC Roster (2023)

Chair: Christine Castano, MD, Optum
Alice Gunderson, PFCC Partners, Patient Advisor Network
Alyson Spencer, Blue Shield of California Promise Health Plan
Andy Dang, MD, Sharp Rees-Stealy Medical Group
Bihu Sandhir, MD, AltaMed
Cheryl Damberg, PhD, RAND
Edward Yu, MD, Sutter Palo Alto Medical Foundation
Eric Garthwaite, Health Net
Frederick Kuo, MD, UnitedHealthcare
Kenneth Phenow, MD, Cigna
Leticia Schumann, Anthem
Marnie Baker, MD, MemorialCare Medical Group
Pegah Mehdizadeh, DO, Aetna
Peter Robertson, Purchaser Business Group on Health
Rachel Brodie, Purchaser Business Group on Health
Ralph Vogel, PhD, Kaiser Permanente
Sara Frampton, Kaiser Permanente Health Plan
Sherilyn Wheaton, MD, Primary Medical
Ting Pun, PFCC Partners, Patient Advisor Network Tory Robinson, Blue Shield of California

Please note that the methodology and display decisions made by CDII/OPA do not necessarily reflect the views of each organization on the advisory committee.

Additionally, CDII/OPA values the opinions and perspectives of other stakeholders with interest and expertise in the field of healthcare quality measurement, data collection and display and, as such, welcomes questions and comments sent to OPAReportCard@ncqa.org.

Stakeholder Preview and Corrections Period

Each year, prior to the public release of the CDII/OPA Report Cards, all participating health plans and medical groups are invited to preview the Health Care Quality Report Cards. Health plans and medical groups are given access to a test web site with updated results and given several days to review their data and submit corrections and questions regarding the data and methodology to CDII/OPA and its contractors. If an error in the data is identified within the given time period, it is corrected prior to the public release of the CDII/OPA Report Cards.

Health Plan CAHPS Scoring Methodology

There are three levels of measurement:

1. **Stand Alone CAHPS Measures**: The eligible measures consist of the CAHPS* 5.1H commercial measures for Reporting Year 2023, reported by the National Committee for Quality Assurance (NCQA).

2. **Topic**: There are three composite topic areas composed of nine (9) commercial CAHPS measures.
3. **Summary Performance**: There is one composite category, “Patients Rate Overall Experience,” which is the aggregated All-CAHPS summary performance score composed of nine (9) commercial CAHPS measures.

See Appendix A for mapping of CAHPS measures to performance topics and Appendix B for mapping of CAHPS measures to stand-alone patient experience ratings.

### 2-year Rolling Average

There are two specific measures that are calculated manually by multi-question composites, based on a 2-year rolling average: *Plan Customer Service*, and *Paying Claims*. Each question over two years is summed, and the total of each question over two years is averaged to create the rate of performance for each composite (e.g. Question 24 responses are summed from MY 2021 and MY 2022 and averaged with the same sum for Question 25 to create the rate of performance displayed for Customer Service in RY2023). The purpose for a 2-year rolling average is to amass a denominator large enough to report, given the difficulty most plans have in reaching the minimum reporting threshold in one measurement year across the entire composite.

### Performance Grading

HMOs and PPOs are graded on performance relative to the nation for CAHPS for “Patients Rate Overall Experience” for HMO/PPOs. All of the performance results are expressed such that a higher score means better performance. Based on relative performance, plans are assigned star ratings for multi-level summary indicators.

Star rating performance grading is based on the NCQA RY 2023 Quality Compass® All Lines of Business (Health Maintenance Organization-HMO, Point of Service-POS, Preferred Provider Organization-PPO, and Exclusive Provider Organization-EPO) benchmarks. Quality Compass RY 2023 values are used to set performance cutpoints for new or revised measures.

### Summary Performance Indicator Scoring

One summary performance indicator result is reported: “Patients Rate Overall Experience.” This summary rating is an aggregation of the measures within the three composites: 1) “Getting Care Easily”, 2) “Satisfaction with Plan Services” and 3) “Satisfaction with Plan Doctors.”

### Composite Category and Topic Scoring

The NCQA CAHPS proportional scoring specifications are used to score both topic and category composites in Appendix A. Per NCQA scoring rules, CAHPS composite results are first rounded to the 100th decimal, and then to the 10th decimal, before adding a 0.5 point
buffer to the rounded mean score. This sum (rounded mean + 0.5) is used to assign the star rating performance grade.

**Handling Missing Data**

Not all health plans are able to report valid rates for all measures. In order to calculate summary performance indicator star ratings for as many health plans as possible, we impute missing data under specific conditions using an adjusted half-scale rule. This is accomplished by developing an actual measure level result for plans with missing data and using those for star calculations. Imputed results are not reported as an individual rate. If a plan is able to report valid rates for at least half of its measures in a topic, then missing values are replaced using this adjusted half-scale rule for all measures in the topic. Because eligibility for missing value re-assignment (imputation) is assessed independently at the summary indicator level, it is possible to have a summary indicator score even if topic scores are missing.

2. **EPO Reporting Type:** Historically, CDII/OPA has used HMO, POS, PPO, or any combination thereof for the benchmark calculation. However, CDII/OPA has not included EPO or any combinations involving EPO for the CDII/OPA national benchmark until this update for MY 2022. EPO is now included as a plan type in the calculation to provide a more accurate national benchmark.

**Calculate Percentiles**

1. One of five grades are assigned to each of the three summary performance indicators using Table 1 cutpoints. Four cutpoints are used to calculate the performance grades. Cutpoints were calculated per the NCQA RY 2023 Quality Compass® All Lines of Business (Health Maintenance Organization-HMO, Point of Service-POS, Preferred Provider Organization-PPO, and Exclusive Provider Organization-EPO).

2. Percentiles are established by first calculating the composites (unweighted averages of each of the grouped measures at the topic and category level) for National All Lines of Business. Then the 90th, 65th, 35th, and 10th percentiles of each topic and category composite are calculated across National All Lines of Business.

**From Percentiles to Stars**

1. Health plan performance in MY 2022 is graded against score thresholds derived from MY 2022 (RY 2023) data. There are four thresholds corresponding to five-star rating assignments. If a category performance indicator composite rate meets or exceeds the “Excellent” threshold, the plan is assigned a rating of five stars. If a summary performance indicator composite rate meets or exceeds the “Very Good” threshold (but is less than the “Excellent” threshold) then the plan is given a rating of four stars. If a summary performance indicator composite rate meets or exceeds the
“Good” threshold (but is less than the “Very Good” threshold) then the plan is given a rating of three stars. If a summary performance indicator composite rate meets or exceeds the “Fair” threshold (but is less than the “Good” threshold) then the plan is given a rating of two stars. Summary performance indicator scores that are less than the two star “Fair” threshold result in a rating of one star “Poor”.

2. The grade spans vary for each of the three summary performance indicator topics listed in Table 1:

   a) Top cutpoint: 90th percentile nationwide
   b) Middle-high cutpoint: 65th percentile nationwide
   c) Middle-low cutpoint: 35th percentile nationwide
   d) Low cutpoint: 10th percentile nationwide

<td>76</td>
<td>72</td>
<td>66</td>
<td>&lt; 66</td>
</tr>
</tbody>
</table>

3. A buffer zone of a half-point (0.5) span is applied. Any HMO or PPO whose score is in the buffer zone that is 0.5 point below the grade cutpoint is assigned the next highest category grade. For example, a “Getting Care Easily” score of 82.5 would be assigned a grade of “Good”. A score of 82.4, which is outside of the buffer zone, would be assigned a grade of “Fair”.
