Digital Identity Health Care Providers Focus Group Meeting #1
Chat Log (2:30PM – 4:00PM PT, February 14, 2022)**

The following comments were made in the Zoom chat log by Health Care Providers Focus Group Members and the public during the February 14th virtual meeting:

00:39:05 Khoua Vang: yes,
00:39:18 Khoua Vang: do you want to unmute him?
00:39:23 Gil Shlamovitz, MD: agree with you Brian.
00:40:05 Gil Shlamovitz, MD: but rather we focus on a DL first.... then need to address the use case of compromised identity, new DL for same individual etc.
00:43:31 Stephanie Pruett: I think our first challenge in this area is a standard algorithm for matching patients. I agree with Gil, our best approach to managing the patient identity is to align with the current national exchanges, CommonWell, CareQuality and eHealth Exchange. Standardizing at a state level is a good thing but the issue is nation wide.
00:51:24 Nate Carroll (Ventura): Yes, excellent point!
00:51:43 Nate Carroll (Ventura): My comment was regarding Gil's statement.
00:52:06 Nate Carroll (Ventura): But also agree with Stephanie.
00:52:19 Stephanie Pruett: i need to be unmuted
01:09:52 Ashish Atreja: That's correct- like creating network of networks
01:10:14 Stephanie Pruett: It is important to appreciate that different models exist.
01:23:28 Nate Carroll (Ventura): Thanks for allowing us the opportunity to participate in the discussion!
01:23:42 Nate Carroll (Ventura): One final thought is that it may be interesting to look into what Estonia has done as a country
01:24:06 Nate Carroll (Ventura): ...with their digital identifier initiative- what works, accessibility, etc.
01:24:36 Gil Shlamovitz, MD: Thank you all for all that you do! have a good evening!
