

**California Health & Human Services Agency
Center for Data Insights and Innovation
Data Exchange Framework Stakeholder Advisory Group
Meeting 7 Q&A Log (10:00AM – 12:30PM PT, April 7, 2022)**

The following table shows comments that were entered into the Zoom Q&A by public attendees during the April 7th meeting:

Count	Name	Comment	Response
1	Jim Sullivan - TCS Healthcare Consulting & Services Integration	To Carmela's points on governance and roles/function... when these issues are defined, what is the level of authority any part of this advisory group and subcommittees have in implementing/enforcing and technology or policies deemed essential?	
2	Timi Leslie	@DxFA here is a fact sheet we produced as an intro to TEFCA and key considerations https://cbhsite.wpengine.com/wp-content/uploads/2022/02/CBH-TEFCA-and-DEF-fact-sheet.pdf	
3	Timi Leslie	^ Hi @Jim Sullivan!	
4	Timi Leslie	'@ jonah - agree, consumers should be centered in this conversation	
5	"Lane, Steven MD MPH "	As TEFCA comes on line and evolves, the first steps we can make is assuring that HIEs, providers and other participants in statewide exchange leverage the currently available interoperability solutions that will eventually become a part of TEFCA. What we have readily available today is push messaging (via Direct Secure Messaging), and query-based exchange of documents (via the numerous networks connected through the Carequality Framework) as well as evolving FHIR-based exchange capabilities.	
6	Jim Sullivan - TCS	Hi Timi - hope you've been well! Should catch up soon @Timi Leslie	Hi Timi - hope you've been

Count	Name	Comment	Response
	Healthcare Consulting & Services Integration		well! Should catch up soon @Timi Leslie
7	Karen Ostrowski	'+1 for Claudia's comment about TEFCA...while it is important to consider TEFCA, it does have limitations and doesn't meet the broad data sharing goals outlined in AB 133.	
8	"Lane, Steven MD MPH "	There is and evolving TEFCA FHIR Roadmap that we would be wise to align with: https://rce.sequoiaproject.org/wp-content/uploads/2022/01/FHIR-Roadmap-v1.0_updated.pdf	
9	"Lane, Steven MD MPH "	In addition to Timi's cautious TEFCA review above, this is a useful summary resource: https://rce.sequoiaproject.org/wp-content/uploads/2022/01/Common-Agreement-Users-Guide.pdf	
10	"Jerry Hall, CivicMapping.com "	Will we be able to offer a public comment still?	
11	Karen Ostrowski	It's very unfortunate that this topic on consent/privacy has been skipped because it is a central issue and key barrier to exchange. Hopefully there will be an open discussion in a future meeting before any recommendations are put forth.	Karen - thank you so much for your comment. We have been collecting comments through the Advisory Group and Data Subcommittee process, but would still welcome any additional feedback you

			may have about the material shared over chat at this meeting or in the next two weeks via email at CDII@chhs.ca.gov. Thank you for participating.
12	"Lane, Steven MD MPH "	We have discussed leveraging the USCDI V2 standard in California. This includes a number of additional useful demographic edata elements that advance equity considerations.	
13	"Jerry Hall, CivicMapping.com "	I did email more specific comment via email and hope to connect with other stakeholders interested in this work, especially around consumer privacy and control as well as private-enterprise or corporate access. I'm posting these comments on CivicMapping.com/blog in the next hour. Thank you.	
14	"Lane, Steven MD MPH "	A specific new standard that we should push to implement ASAP in California is the specification recently published as a part of Project US@, which is likely to be incorporated into USCDI as part of the current annual update cycle. https://oncprojecttracking.healthit.gov/wiki/pages/viewpage.action?pageId=180486153	Dr Lane, thank you for the resources you have provided.
15	"Lane, Steven MD MPH "	This is the latest piece of a long list of related work done by ONC to support Patient (person) Identity and its role in Patient Record Matching: https://www.healthit.gov/topic/patient-identity-and-patient-record-matching	live answered
16	Daniel Savino (ARCA)	Can we get non-speaking members muted, please?
