

I believe I raised all of my comments during our meeting, but I would like to take this opportunity to again point out that we have not resolved issues of whether any participant can charge fees to another participant for exchange of data. We resolved this for access by individuals or their personal representatives - but there was insufficient time for a detailed discussion about how to handle this issue for other exchange use cases. I believe we need a policy & procedure on that issue - but it will likely need to be taken up in more detail as part of the ongoing efforts to further refine the P&Ps.
