

DATA STRATEGY

The CalHHS Center for Data Insights and Innovation's data strategy is built on these principles.

DATA QUALITY

Ensuring quality and equitable data sets provide increased value to Agency decision-makers

DATA CONTENT

Providing a safe place to store data so it remains uncorrupted and available to researchers

DATA GOVERNANCE

Creating standards, procedures, and policies for secured data-sharing, collection, and access by and through Agency departments

DATA STORAGE

Providing structured oversight to the collection, storage, and access of data sets within Agency

DATA ACCESS

Establishing secure portals for access and analysis in a diverse cloud-based data environment

DATA INFORMED DECISION MAKING

Leveraging insights from current and historical data to use for strategic planning, disaster response, and Agency development
