

OPA Complaint Data Report Background and Methodology

Measurement Year 2017

OPA Complaint Data Report Background

OPA is statutorily charged under the [California Health and Safety Code §136000](#) with the development and implementation of a multi-departmental complaint data reporting initiative. OPA is mandated to annually report health care complaint data and related consumer assistance information from four state entities with consumer assistance service centers – the Department of Managed Health Care (DMHC), Department of Health Care Services (DHCS), Department of Insurance (CDI), and Covered California (collectively called “reporting entities”). These four state reporting entities are statutorily required to submit non-aggregated complaint data to OPA.

The reporting requirements for OPA’s annual Complaint Data Report were first established in 2011 through legislation authored by Assemblymember Bill Monning (AB 922, Chapter 552, Statutes of 2011) and amended through a budget trailer bill (SB 857, Chapter 31, Statutes of 2014). This legislation established the state’s first multi-departmental health care complaint report.

When OPA began the complaint data reporting initiative, there was an absence of standardized complaint definitions and coding across the state reporting entities. OPA has worked closely with the reporting entities to address differences and make ongoing improvements toward collecting and reporting comparable data. After rounds of testing and fine-tuning of collection tools, the reporting entities provided their first complaint data submissions to OPA in March 2015 containing records of complaints closed in 2014. The first Complaint Data Report, the *Baseline Report to the Legislature for Measurement Year 2014*, was issued in May 2016. Over 100,000 complaint records were submitted for the baseline year.

In the subsequent rounds of Measurement Year (MY) data submissions, OPA has continued to adjust the coding to allow for the unique types of complaints and processes used by the reporting entities. OPA released the Annual Complaint Data Reports for MY 2015 and MY 2016 in January 2017 and April 2018, respectively.

Enhancements and Changes for the Measurement Year 2017 Report

OPA made enhancements to report displays and features, including new:

- Charts showing the months that consumers filed complaints with the state service centers.
- Medi-Cal Managed Care plan analysis based on DMHC data.
- Reason-to-results analysis of DHCS data.
- Data on CDI non-jurisdictional complaints referred to other agencies or departments.

Other reporting changes:

- DMHC excluded health plan grievance violations from its MY 2017 submission.
 - DMHC made the reporting change because the violations were not the primary reasons for consumers to initiate complaints, but were rather issues with Knox-Keene grievance system requirements identified after DMHC closed the complaints to the consumers.
 - These issues were previously reported under the Other Violation of Insurance Law/Regulation reason and accounted for approximately four percent of DMHC’s MY 2016 complaint volume.
- DHCS made changes to how some complaint reasons were mapped to OPA’s standard reasons categories and reported the category Denied Services for the first time in 2017.

- DHCS did not submit 2017 Managed Care data for the Race, Ethnicity, and Primary Language categories as it had in prior years. DHCS plans to resume reporting these demographic categories for MY 2018.
- DHCS's Office of the Ombudsman's 2017 data included inquiries previously reported separately under the Mental Health Ombudsman. As of February 2017, the Mental Health Ombudsman's consumer assistance services were transitioned under the Medi-Cal Managed Care Office of the Ombudsman, which is now referred to as the Office of the Ombudsman.
- CDI reported non-jurisdictional complaints it referred to other entities for the first time in 2017.
- CDI did not report health plan names in its 2017 complaint records, but instead submitted complaint totals for companies with more than 25 complaints in 2017.
- CDI also made changes to how the department mapped certain complaint results and reported the category Overturned/Health Plan Position Overturned for the first time in 2017.

Measurement Year 2017 Data Sources

This fourth OPA Annual Complaint Data Report evaluates health care complaints closed during MY 2017 (January 1 through December 31, 2017), and provides comparisons MYs 2015 and 2016 when possible. DMHC, DHCS, CDI, and Covered California are statutorily required to annually provide OPA with non-aggregated complaint data and other consumer assistance information. The 2017 complaint records submitted to OPA by reporting entity:

DMHC

Complaint Types: Standard Complaints, Independent Medical Reviews, Quick Resolutions, and Urgent Nurse

Data Source: The DMHC complaint data and supplemental survey submissions were provided by the department's Help Center.

DHCS

Complaint Type: State Fair Hearings [conducted by the California Department of Social Services (CDSS)]

Data Sources: The DHCS Information Management Division coordinated the department's complaint data and supplemental survey submissions. The complaint data was sourced from various DHCS divisions that maintain records about State Fair Hearings conducted by the CDSS State Fair Hearings Division involving the DHCS divisions' programs. The following DHCS divisions contributed data for MY 2017: Benefits, California Medicaid Management Information System, Clinical Assurance and Administrative Support, Long Term Care, Managed Care Operations, Medi-Cal Dental Services, and Mental Health Services.

CDI

Complaint Types: Standard Complaints and Independent Medical Reviews

Data Source: The CDI complaint data and supplemental survey submissions were provided by the department's Consumer Services Division.

Covered California

Complaint Types: State Fair Hearings (conducted by CDSS) and State Fair Hearings: Informal Resolution (referred by CDSS for resolution by Covered California without a hearing)

Data Sources: The Covered California Policy Division coordinated the complaint data and supplemental survey submissions. The complaint data submission included information from the CDSS State Fair Hearings Division about State Fair Hearings, including both hearings decided by an Administrative Law Judge and hearing requests referred back to Covered California for informal resolution. The supplemental survey data was from the Covered California Service Center Division.

Data Collection Tools

To execute the reporting requirements per the Health and Safety Code §136000, OPA has used three primary tools to collect data from the reporting entities for MYs 2014-2017: 1) Complaint Data Workbook, 2) Complaint Data Validation Application, and 3) Consumer Assistance Supplemental Survey. OPA used these tools to collect comparable data about the service centers operated by CDI, DMHC, DHCS, and Covered California and about the complaints made by health care consumers to these reporting entities' complaint review systems. The complaint data collected is comprised of a combination of qualitative descriptive information as well as the quantitative records on the actual complaints closed during the measurement year.

Based on feedback from the reporting entities on ways to improve the efficiency of the reporting process, OPA moved to an annual submission process for the MY 2017 complaint data. OPA continued to collect other service center information through the Consumer Assistance Supplemental Survey tool. The 2014-2016 complaint data was previously obtained through a biannual submission process, with separate submissions of Quarters 1 -2 data and Quarters 3-4 data at different times during the year.

Complaint Data Validation Application and Workbook

The four reporting entities submitted MY 2017 complaint data to OPA using a web-based Complaint Data Validation Application. This application validates data based on the data categories and elements established for each measurement year collection. Complaint data submissions must meet an established error rate threshold in order to be accepted through validation. Accepted MY 2017 files had an error rate below one percent.

In partnership with its information technology team, OPA transitioned to this web-based collection tool for MY 2015 data submissions to improve the efficiency and accuracy of the data collection process. For MY 2014, the Complaint Data Workbook served as the primary data collection tool to create the cumulative database of complaint cases submitted by CDI, DHMC, DHCS, and Covered California. After the transition to the web-based application, the Workbook spreadsheet served as a reference document of acceptable data elements.

Most of the complaint data collection categories and elements are based on standard complaint codes used by the National Association of Insurance Commissioners (NAIC). Through collaborative efforts to work with the reporting entities and stakeholders, OPA has adjusted data elements each year to meet reporting objectives and align with the state reporting entities' systems. A Glossary of Complaint Data Report terms is included in Appendix A of each Annual Complaint Data Report to the Legislature. The MY 2017 Report Glossary is posted on the OPA website at www.opa.ca.gov/ComplaintsReports/Documents/ComplaintReport2017_Glossary.pdf.

Consumer Assistance Supplemental Survey

Through an annual Consumer Assistance Supplemental Survey, the reporting entities provide to OPA additional information about their consumer assistance service centers. This survey information includes consumer call statistics and other service center contact volumes, enrollment figures for plans and programs the entities oversee, and descriptive information about their service centers, such as basic operations (phone numbers, website, hours, etc.), complaint protocols and referral procedures, and system capabilities (communication and database) for tracking calls and complaints.

Data Quality Assurance

Complaint data submissions for MY 2017 from the reporting entities met an error rate threshold of one-percent in order to be accepted through the web-based validation application. This collection tool validated data submissions based on established data categories and elements and acceptable standardized formats. OPA and its public reporting contractor, the National Committee for Quality Assurance (NCQA), conducted

additional quality assurance reviews to validate the complaint submissions while preparing the data for analysis. Reporting entities provided guidance or resubmitted data corrections as needed to address any issues noted through the validation and quality assurance activities. OPA's report analysis was further reviewed by NCQA and the reporting entities prior to publication.

Requests for Assistance and Inquiry Methodology

Requests for assistance volumes represent the full volume of consumer assistance reported to OPA for each entity, encompassing both complaints and inquiries. OPA calculates requests for assistance and inquiry volumes depending on the role of its service center(s) for processing the entity's reported complaints.

For entities that reported complaint data to OPA about complaints handled directly by their service centers:

- The service center volume reported to OPA through the Supplemental Survey is counted as the entity's requests for assistance volume.
- The entity's inquiry volume is calculated by subtracting the volume of complaints reported to OPA from the overall service center volume.
- DMHC and CDI reported complaint data for complaints initiated through their respective service centers.

For entities with service centers that are not directly involved in the initiation of the complaint review process for the complaints reported to OPA:

- The service center volume(s) reported to OPA through the Supplemental Survey is counted as the entity's inquiry volume.
- The entity's requests for assistance volume is calculated by adding the volume of complaints reported to OPA to the service center volume(s).
- DHCS and Covered California reported complaint data about State Fair Hearings, which are not initiated through their respective service centers that reported consumer assistance volumes to OPA. DHCS reported inquiry data from multiple service centers.

Health Plan Complaint Ratios

In order to provide a more equitable comparison of health plans of various sizes, OPA calculated health plan complaint ratios by taking the number of closed complaints associated with a health plan and dividing it by the number of enrollees the health plan had in 2017. OPA obtained enrollment figures from the reporting entities for the health plans associated with each entity's jurisdiction.

Changes to enrollment data methodologies continue to be made to better align with reporting entities' usual collection and reporting processes. Due to timing and other reporting methodology differences, enrollment figures may not be comparable from year to year.

- For 2017, like the previous reporting year, DMHC and CDI provided December enrollment data and DHCS and Covered California provided March enrollment data.
- Although the DMHC 2017 enrollment total shown in the report is for full-service health plans only and excludes enrollment in specialty health plans, DMHC still provided specialty plans' enrollment figures for the 2017 health plan complaint ratio analysis.

The CDI MY 2017 health plan ratios were calculated based on complaint totals CDI provided for its health plans that had 25 or more complaints closed in 2017. In prior years, OPA determined the plan totals from CDI's submitted complaint dataset. CDI submitted its MY 2017 complaint records without health plans.

OPA established an enrollment threshold for health plan-related displays in the public complaint data reports. Health plans displayed have over 70,000 members in the measurement year.

Reason-to-Result Analysis

For MY 2017, OPA analyzed the complaint results for the top three complaint reasons reported by DMHC, DHCS, and Covered California. OPA's data collection fields allow for reporting entities to submit up to three reasons and up to three results for each complaint record.

DMHC records allowed for the analysis due to the limited number of dual results combinations (the two dual combinations were treated as new composite results). The analysis was possible for DHCS's top complaint reasons, as these associated records had limited number of results combinations. This analysis also was possible for Covered California because all of its records had a single complaint reason and a single result. CDI submitted more complex datasets containing many complaint records with multiple reasons and multiple results, which cannot be separated into a single reason-to-single result breakdown. The complaints with multiple reasons and results cannot be omitted from the analysis without skewing the findings.

County Complaint Ratios

In order to provide a more equitable comparison of counties of various sizes, OPA calculated county complaint ratios for DHCS and Covered California MY 2017 data. For each respective health care program, the number of closed complaints associated with a county was divided by the number of the program's 2017 enrollees in the county. The county complaint totals were based on the complainants' identified resident county. OPA obtained program enrollment figures by county from DHCS and Covered California. OPA established enrollment and complaint volume thresholds for public display of the county ratios in the complaint data reports. Displayed counties had over 10 complaints and at least 10,000 program members during the measurement year.

Privacy Considerations

OPA follows California Health and Human Services Agency (CHHS) guidelines to ensure that publicly reported complaint data meets the requirements of the California Information Practices Act and the Health Insurance Portability and Accountability Act. In addition, Data Usage Agreements with DHCS and Covered California include privacy requirements for OPA's handling of those entities' data.

Data is de-identified prior to public reporting according to the "CHHS Data De-Identification Guidelines" document, which is available for download through the online [CHHS Data Playbook Resource Library](https://chhsdata.github.io/dataplaybook//resource_library/) (https://chhsdata.github.io/dataplaybook//resource_library/). Categories with complaint volumes of 10 complaints or fewer are not publicly displayed, unless aggregated into a larger category grouping.

Additional Guidance about the Complaint Data and Resulting Analysis

One of the ongoing challenges for meaningful analysis of health care complaint data across reporting entities is the differences in data collection and complaint systems, which are not standardized in terms of definitions, coding, tracking, or performance metrics. OPA continues to work with all of the reporting entities to improve and standardize the reporting of complaint data to OPA.

- Analyses of many data categories remain in separate reporting entity sections rather than aggregated statewide due to complaint system differences. OPA urges caution on comparing these categories across reporting entities or aggregating data into a statewide metric.
- Meaningful comparisons between measurement years may be limited due to annual adjustments made for standardization or alignment improvements.
- Although a pattern or emergence of consumer complaints may indicate systemic issues, complaint data can be an imperfect measure when comparing findings by reporting entity, coverage type, and similar categories.

Appendix A. Complaint Data Collection Categories and Elements for Measurement Year 2017

The reporting entities submitted data to OPA using the following standardized data categories and elements largely based on complaint coding established by the National Association of Insurance Commissioners. In collaboration with the reporting entities, OPA has added and adjusted accepted data elements to better align with data collected by DMHC, DHCS, CDI, and Covered California.

Case ID

Required field. The Case ID must be unique for each reported complaint record.

Type of Complaint

Required field. Accepted elements:

- Complaint/Standard Complaint: STD
- DSS State Fair Hearing
- DSS State Fair Hearing: Informal Resolution
- Independent Medical Review: IMR
- Quick Resolution: QRN
- Urgent Nurse Case: URG

“DSS State Fair Hearing: Informal Resolution” was first reported for MY 2015 by Covered California, but officially added to the collected elements list for MY 2016.

Initial Mode of Contact

Required field. Accepted elements:

- Telephone
- Mail
- Email
- Online
- Fax
- Counter/In-Person
- Other
- Unknown

Date of Birth

Required field. Accepted elements:

- Date in format of mm/dd/yyyy
- Unknown
- Refused

Age

Accepted elements: Any numeric entry accepted for the data submission.

The OPA report includes analysis based on Age for the following age groups:

- Under 18
- 18-34
- 35-54
- 55-64
- 65-74
- 75 and older
- Unknown

Records submitted without either Age or Date of Birth identified were analyzed as age Unknown. For complaint records where the Date of Birth was provided instead of Age, the complainant's age was calculated as of December 31st of the measurement year.

Gender

Required field. Accepted elements:

- Male
- Female
- Transgender Male
- Transgender Female
- Nonbinary
- Other
- Unknown
- Refused

Transgender Male, Transgender Female, and Nonbinary were new elements added for MY 2017 collection.

Race

Required field. Accepted elements:

- White
- Black or African American
- American Indian or Alaska Native
- Asian
- Native Hawaiian
- Other Pacific Islander
- Native Hawaiian or Other Pacific Islander
- Other
- Unknown
- Refused

“Native Hawaiian” and “Other Pacific Islander” were added as separate elements in MY 2017, with the combined element remaining as an option for reporting entities that cannot separate. Starting MY 2016, entities reported complaints under “Other” that were reported in prior years under “Multi-racial” (element was retired). Race elements with low volumes of complaints were combined for the report analysis and displayed under Other.

Ethnicity

Required field. Accepted elements:

- Hispanic or Latino
- Not Hispanic or Latino
- Unknown
- Refused

Primary Language Spoken

Required field. Accepted elements:

- Arabic
- Armenian
- Cambodian
- Cantonese
- English
- Farsi
- Hmong
- Japanese
- Korean
- Mandarin
- Other
- Other Chinese
- Refused
- Russian
- Spanish
- Tagalog
- Unknown
- Vietnamese

Primary Language elements with low volumes of complaints were combined for the report analysis and displayed under Other.

Resident County

Required Field. Accepted elements:

- Alameda
- Alpine
- Amador
- Butte
- Calaveras
- Colusa
- Contra Costa
- Del Norte
- El Dorado
- Fresno
- Glenn
- Humboldt

- Imperial
- Inyo
- Kern

- Sonoma
- Stanislaus
- Sutter
- Tehama
- Trinity
- Tulare
- Tuolumne
- Ventura
- Yolo
- Yuba
- Unknown
- Refused
- Out of State

The OPA report includes analysis by Resident County. For records where a Resident Zip Code was identified instead of a Resident County, OPA referenced the United States Postal Service Zip Code Database to determine the Resident County. Non-California counties were counted as Out of State and invalid zip codes were counted as Unknown.

Resident Zip Code

Required Field. Accepted elements:

- xxxxx or xxxxx-xxxx (numeric five or nine-digit zip code)
- Unknown
- Refused

Insurer or Plan

Accepted elements: Although the following company names were provided for standardization purposes, the reporting entities were not limited to the companies listed.

DMHC first reported Uninsured as a source of coverage in MY 2017, re-categorizing complaints previously identified under the source of coverage the complainant sought or from which the complainant was cancelled. DMHC made this data collection change starting in March 2017. OPA used the new element for DMHC data within the MY 2017 report. Other reporting entities continue to categorize by the coverage the complainant lost or was seeking.

For MY 2016 collection, “Medi-Cal” was added and “Medi-Cal Fee for Service” and “Medi-Cal Managed Care” were removed from Coverage Source. This update was made to better align with DHCS reporting preferences. DHCS and DMHC first reported Managed Care and Fee for Service designations under Product Type for MY 2015.

DMHC first reported “Uninsured” and “Discount” as product types in MY 2017. Those identified as “Uninsured” were previously identified under the source of coverage the complainant sought or from which the complainant was cancelled. Those identified as “Discount” were previously identified as either “HMO” or “PPO,” depending on the Discount plan product. DMHC made these data collection changes starting in March 2017. OPA used the new elements for DMHC data within the MY 2017 report. Other reporting entities continue to categorize by the coverage the complainant lost or was seeking.

“0540 Long Term Care” was added as MY 2017 collection element, replacing the DHCS-oriented “Long Term Care: PACE” and “Long-Term Care: SCAN” elements. OPA’s MY 2016 report analysis included “Long Term Care” for the first time, aligning with data submitted by DHCS that did not correspond to the PACE and SCAN designations.

“Fee for Service” and “Managed Care” elements were added under Product Type for MY 2016 collection and analysis to align with DHCS reporting preferences for categorizing its delivery systems, and the data reported by DHCS and DMHC for MY 2015. These designations were previously reported under Source of Coverage. “HMO with Deductible” was added for MY 2016 collection to better align with data reported by DMHC.

DHCS reports its delivery systems as product types. Data for its Breast and Cervical Cancer Program is submitted and counted in the statewide analysis as 0555 Cancer/Dread Disease, but appears under the program name within the DHCS report section.
