1	Bill Barcellona	Hey, Good morning. This has been a good meeting today. I appreciate it. Just to pick up on David Ford's comments at the beginning of the meeting around Grant funding, I do think it' be helpful to recognize kind of the unique role of the larger medical-based IPA models in the State, and there's about a 100 of them. They serve about 7 million medical beneficiaries, and, you know, Jonah will recall that back when we were involved in high tech in the late-2000s we missed a big opportunity to put funding at the level of IPAs, so that they could acquire and train and maintain their networks on a common EHR platform. And I think if we could focus on maybe a higher level of funding for that kind of a uniform, standardized HIE network among their doctors and practices we get a lot more bang for our buck in terms of outcomes for CalAIM and DxF. So thanks.
