Meeting #6 Q&A Log (10:30AM – 12:30PM PT, April 24, 2023)

The following table shows comments that were entered into the Zoom Q&A by public attendees during the April 24 meeting:

Count	Name	Comment	Response
1	Nicole Salazar | Ventura County	Hello - where can we find more detailed information on the DxF Grants. We were told that information was going to be released last week however we only still see teh one-page flyer.	The Grants Guide that we had hoped to have posted last week is still being reviewed for ADA compliance. We expect it to be posted soon!
2	Nicole Salazar | Ventura County	Ok - thank you	
3	Candice Rowland	How are applicants suppose to apply for the onboarding grant if the QHIOs are not yet determined?	We are launching the two programs simultaneously (QHIO Program and Grants Program). We have incorporated information on how applicants might address naming a preferred HIO in their Onboarding application, wherein they can name an HIO (prior to it earning a Q) and if said HIO were not to earn a Q, an opportunity to make a change to an HIO who is Q'd or to switch to a TA grant with their HIO of choice.
4	Jennifer Inden (she/her)# Aliados Health	For those presumed mandatory participants but still not specifcially called out (e.g: FQHC's) they will need to wait until the 3rd round? or	Hopefully the Guidance Document will help to guide how an applicant will

Count	Name	Comment	Response
	(formerly RCHC)	can they move forward in the 1st two rounds?	identify in the application portal. If not the Guidance Document, the template of how the application will look on the application portal.
5	Ken Riomales	Has it been established how CDII will filter out applicants who have already received funds from previous programs? It was previously stated that organizations that have previously received funds are ineligible.	CDII will be factoring previous TA funding (most notably HITECH funding, especially Cal-HOP) when scoring applicants.
6	Melanie Slocum# Shasta County	Will information be segregated in the system between services authorized by a parent/guardian/probation officer etc vs those authorized by the minor? Will the authorization be updated to mandate a minor age 12 and older sign for minor consent services to be included as It does not appear it has taken into account minor consent services. Stating a parent "should" have a minor 12 and older to sign. • The health care provider is not permitted to inform a parent or legal guardian without the minor's consent. The provider can only share the minor's medical information with them with a signed authorization from the minor. (Health & Saf. Code §§ 123110(a), 123115(a)(1); Civ. Code §§ 56.10, 56.11).	Thank you for your question. The DSA and P&Ps often cite that the exchange must follow applicable law. I am optimistic that the terms and conditions of the DxF drive what HSSI must be shared, with the cornerstones of privacy, safety, and applicable law.
7	Candice Rowland	If the participant requests the ADT, will it then be required to provide it to them?	Essentially yes. So long as the request adheres to the DSA and P&Ps.
8	Bill Clark	Will critical patient Clinical Data like waveform EKG, CTScans be archived and exchanged over time so Clinicians can review current	

Count	Name	Comment	Response
		and past scans for better diagnosis and if so, when?	
9	Wilma Figueroa# Long Beach Health and Human Services Department	Where can we find the slides and recording for this meeting?	The slides, recording, and meeting materials for this meeting will (soon) be available for download on the DxF website: cdii.ca.gov/committees-and-advisory-groups/data-exchange-framework/
10	Rachel Goldberg	I apologize, I had to join the meeting late and I know this was earlier on today's agenda, but wanted to ask if the DxF DSA Signatory Grant guidance has been posted?	Not yet Rachel, it will be in a few days.
11	L. Johns	Yes pt consent is complicated! All the more reason discussion needs to start sooner rather than later. ;-)	thank you for your comment.
12	Jennifer Inden (she/her)# Aliados Health (formerly RCHC)	Jennifer Inden, Aliados Health representing Safety Net providers: 1) Consent Management and patient rights need to prioritized and explored ASAP and ensured that all P&Ps finalized and in review are mapped to match. 2) ADT feeds need to be filtered through a HIO hub/HIO's 3) HITRUST certificaiton should not be a required component for QHIOs but language that allows industry best practice certifications and alternative route for qualifications such as stacks certfication.	live answered
