

**California Health & Human Services Agency
Center for Data Insights and Innovation
Data Exchange Framework Implementation Advisory Committee Meeting
Chat Log (12:00 PM – 2:30 PM PT, March 19, 2024)**

The following comments were made in the Zoom chat log by Members of the IAC and staff during the March 19, 2024 meeting:

15:02:09 From CalHHS CDII to Everyone:
we hear you

16:32:43 From Felix Su to Everyone:
The lack of Participant Directory entries is a big stumbling block to implementation for us

16:39:23 From Rim Cothren, CalHHS CDII to Everyone:
Thanks, Felix. We are interested in thoughts you and others may have on how to get DxF Participants to prioritize entering their choices in compliance with policy. We have talked a bit about continued education today. What else?

16:41:56 From DeeAnne McCallin to Everyone:
thank you Andrew, good input. Do you mind copying that to the "Everyone" thread, I'd love more to see it.

16:44:31 From Andrew Kiefer to Everyone:
Blue Shield appreciates the questions on our compliance experiences. We think this is worth a follow up discussion before the IAC to lay out what we all are experiencing so we can address the issues head on. There is clearly a lack of awareness and an absence of culture of compliance. I'm unaware what other state laws are treated as optional in the way this one is.

16:59:07 From Felix Su to Everyone:
@Rim, I do think partnering with other CalHHS departments on enforcement levers becomes relevant in addition to education (e.g., perhaps agencies like DHCS, CDPH, etc. can communicate via Provider Bulletins, APLs, AFLs, etc. that entries in the Participant Directory are required.

16:59:27 From Felix Su to Everyone:
I think this is the crux of what @Andrew points out in his comments.

17:05:23 From Felix Su to Everyone:
To @Ali's comment, encouraging the use/adoption of a common infrastructure like the California ADT Network would make high-level ADT tracking/measurement much more feasible for DxF impact measurement (in addition to vastly reducing burden on hospitals providing and providers seeking these notifications).

17:05:54 From Felix Su to Everyone:
As the slide mentions, wherever there is lack of common infrastructure, complete measurement becomes difficult if not impossible.

17:07:57 From Andrew Kiefer to Everyone:

Definitely support the idea of measuring progress. This will help w/ compliance and create an expectation for policy makers and consumers.

17:08:27 From Andrew Kiefer to Everyone:
Agree w/ Felix and Ali.
