

About the QHIOs

- Cozeva – Applied Research Works, Inc.
- Health Gorilla
- Long Health
- Los Angeles Network for Enhanced Services (LANES)
- Manifest MedEx
- Orange County Partners in Health – Health Information Exchange (OCPH-HIE)
- SacValley MedShare
- San Diego Health Connect
- Serving Communities Health Information Organization (SCHIO)

To assist DxF Participants in choosing a Qualified Health Information Organization (QHIO), CDII is providing this resource in collaboration with the QHIOs, which outlines the following information for each QHIO:

- Organization’s website
- Which regions they provide information exchange services
- Point of contact
- Types of organizations served
- Types of data exchange included in their services

Should Participants have additional questions not addressed in this resource, please reach out to the QHIO or email CDII at dx@chhs.ca.gov.

For a quick overview of the QHIOs, see the [QHIOs at a Glance document](#).

Mission, Vision, and Values Statement

At the heart of our mission is a commitment to revolutionize health outcomes by transforming timely, accurate, and comprehensive data into actionable insights, driving impactful provider engagement. Our vision is to lead the charge in advancing value-based care, dismantling barriers to its seamless adoption, and fostering a culture of trust, transparency, and health equity. With a steadfast dedication to patient-centered care, innovation, and collaboration, we are poised to enhance patient care and build a healthier future for all.

LongHealth

Mission, Vision, and Values Statement

Long Health is dedicated to minimizing gaps in care continuity, efficiently coordinating care, and enhancing the patient experience. Our goal is to leverage technology and data transformation to support patient-centered, value-based, and population-based care delivery models.

Closing Gaps, Uniting Data

Long Health empowers healthcare providers with seamless, secure, real-time data exchange solutions through a single, simple connection, eliminating the complexity associated with fax, secure email, or standard network APIs.

Long Health Opt-Out Policy

Patients can notify Long Health of their decision to opt-out of data sharing at any time. This can be done by contacting our support team via phone (408-673-8215) or email (contact@longhealth.io)

Mission, Vision, and Values Statement

LANES (Los Angeles Network for Enhanced Services) is an independent non-profit organization that has developed a community-based health information exchange in the Greater Los Angeles area and Southern California.

Our mission is to improve healthcare delivery by providing a platform that enables cost-effective and secure electronic exchange of patient medical records among public and private healthcare providers and payers. As a public benefit organization, our goal is to streamline care delivery and drive change, measured by impact on outcomes.

LANES Opt-Out Policy

LANES is an opt-out HIE/QHIO, meaning by default, patients' data is shared. Patient data is available for access by authenticated LANES participants unless the patient elects to opt-out of sharing.

Once patients are notified by your office that you are participating in LANES health information exchange, nothing is required by patients who wish to participate because they are by default opted-in.

Manifest MEDEX

Mission, Vision, and Values Statement

Manifest MedEx’s mission is to provide every health care organization with the information it needs to improve care, enhance health, and lower costs.

As a mission-driven, nonprofit QHIO, we do not sell or monetize data. We believe health equity starts with digital equity and are committed to supporting all DxF Participants—regardless of their location, technical capabilities, or resources—by advancing health data infrastructure to achieve CalAIM, DxF, and public health goals.
