

MEETING  
STATE OF CALIFORNIA  
HEALTH AND HUMAN SERVICES AGENCY  
CENTER FOR DATA INSIGHTS AND INNOVATION  
COMMITTEE FOR THE PROTECTION OF HUMAN SUBJECTS

FRIDAY, MARCH 7, 2025

8:33 A.M.

1215 O STREET, 11TH FLOOR  
CLIFFORD B. ALLENBY BUILDING  
MEETING ROOM 1181  
SACRAMENTO, CALIFORNIA 95814  
AND  
ZOOM ONLINE MEETING PLATFORM

Reported by:  
Peter Petty

## APPEARANCES

### COMMITTEE MEMBERS

Catherine Hess, PhD, Dr., Chair

Larry Dickey, MD, MPH, Vice Chair

Maria Dinis, PhD, MSW

Jonni Johnson, PhD

Carrie Kurtural, JD

Laura Lund, MA

Philip Palacio, EdD, MS

Juan Ruiz, MD, Dr.PH, MPH

Maria I. Ventura, PhD

### CPHS STAFF PRESENT

Agnieszka Rykaczewska, PhD, Administrator

Sussan Atifeh, Staff Services Analyst

Karima Muhammad

Nicholas Zadrozna

### ALSO PRESENT

#### CalHHS

Agnieszka Rykaczewska, PhD, CDII Deputy Director

Jared Goldman, General Counsel

#### CDII

Agnieszka Rykaczewska, PhD, CDII Deputy Director

APPEARANCES (CONT.)

PUBLIC

Stephen Henry

ALSO, PRESENT

PRINCIPAL INVESTIGATORS AND ASSOCIATE INVESTIGATORS

Dr. Michael Hoyt, UC Irvine

Dr. Jennifer Tsui, University of Southern California

Emily Dang, University of Southern California

Dr. Jessica Schleider, Northwestern University

Gina Misch, Kooth Digital Health

Proceedings

1 CHAIR HESS: Good morning everyone, welcome. And  
2 I will call to order the March 7th meeting of the CPHS.

3 DR. RYKACZEWSKA: Welcome everyone. Can we do a  
4 roll call?

5 MS. ATIFEH: Yes.

6 Dr. Hess?

7 COMMITTEE MEMBER HESS: Present.

8 MS. ATIFEH: Dr. Dickey?

9 VICE CHAIR DICKEY: Present.

10 MS. ATIFEH: Dr. Dinis?

11 COMMITTEE MEMBER DINIS: Present.

12 MS. ATIFEH: Dr. Johnson?

13 COMMITTEE MEMBER JOHNSON: Here.

14 MS. ATIFEH: Ms. Kurtural?

15 COMMITTEE MEMBER KURTURAL: Here.

16 MS. ATIFEH: Ms. Lund?

17 COMMITTEE MEMBER LUND: Present.

18 MS. ATIFEH: Dr. Palacio?

19 COMMITTEE MEMBER PALACIO: Here.

20 MS. ATIFEH: Dr. Ruiz?

21 COMMITTEE MEMBER RUIZ: Here.

22 MS. ATIFEH: And Dr. Ventura?

23 COMMITTEE MEMBER VENTURA: Present.

24 MS. ATIFEH: Okay, a quorum is established.

1 DR. RYKACZEWSKA: So, I believe our first order of  
2 business is actually an oath ceremony for Dr. Hess, swearing  
3 her in as Chair. So, we're going to go (indiscernible).

4 (Whereupon Chair Hess is administered the oath of  
5 office by CDII Deputy Director Agnieszka  
6 Rykaczewska)

7 DR. RYKACZEWSKA: Congratulations.

8 CHAIR HESS: Thank you.

9 (Applause)

10 DR. RYKACZEWSKA: And from there, we go to the  
11 Chair updates.

12 COMMITTEE MEMBER HESS: Do you want me to -- do we  
13 want to comment about the current policies and procedures?  
14 I wasn't sure what that was about, actually, when I looked  
15 at it.

16 VICE CHAIR DICKEY: I think it was about keeping  
17 to the current policies and procedures until they change  
18 them.

19 CHAIR HESS: Oh, okay. So, since there are some  
20 changes happening to our policies and procedures, we have  
21 decided that we are going to adhere to the current written  
22 policies and procedures until any changes are made formally  
23 in our policies and procedures document. Okay.

24 COMMITTEE MEMBER LUND: May I ask a question about  
25 that?

1 CHAIR HESS: Uh-hum.

2 COMMITTEE MEMBER LUND: Are the policies and  
3 procedures being updated to reflect information that we had  
4 gotten from legal about the review process and what  
5 constitutes an IPA and what constitutes a Common Rule  
6 review?

7 Because as currently written, it would appear  
8 that we only do Common Rule for human subjects contact  
9 studies. I believe that that is actually the wording that's  
10 used in the policies and procedures, and it turns out that  
11 that is in fact not correct. So, is that part of the  
12 update?

13 VICE CHAIR DICKY: I think what's in the policies  
14 and procedures is that chart that is still in there, that  
15 CPHS legal created, where it shows the flow chart for the  
16 different decisions.

17 COMMITTEE MEMBER LUND: Right. And so, the  
18 document that Agnieszka put together for us actually  
19 clarified and corrected some of that. So, I would request  
20 that we follow what was provided to the Committee by  
21 Agnieszka.

22 DR. RYKACZEWSKA: I think -- I think that part of  
23 it is as we're still discussing these items until the formal  
24 change has been fully passed, we have to stick to the  
25 written document. And I think that that is -- I don't want

1 to put words in your mouth. We are still finalizing that.  
2 It's still under discussion as we still are going through  
3 the regulations discussions.

4 And so, it's just the clarification that until the  
5 formal changes have been passed through the process, and  
6 that is one of the pieces that we are examining of whether  
7 we're going to change that. But until the formal process is  
8 done, I think that's the concern that we don't want to have  
9 a lack of clarity of like whether we're following the  
10 written or the discussed.

11 VICE CHAIR DICKY: And the formal process is the  
12 secretary has to sign off on it. So, this hasn't been  
13 submitted to the secretary yet.

14 DR. RYKACZEWSKA: We are finalizing that chart.  
15 And in part, because there's still these regulations  
16 conversations happening, and so I wasn't sure whether we're  
17 ready or not. So, we'll be looking for the board's  
18 direction in terms of the actual changes.

19 And, of course, the changes will entirely be  
20 presented to the board first, before we would present it to  
21 the secretary.

22 CHAIR HESS: I don't have any others to share,  
23 updates. So, if we can move to administrative updates.

24 DR. RYKACZEWSKA: Absolutely. So, I have a couple  
25 of updates. One is that there was routine audit of the

1 Committee for the Protection of Human Subjects by the FDA.  
2 The last one, just as a fun fact, was in 1993. It had been  
3 a while since we had gone through one of these.

4 There was one observation made that some of the  
5 historical rosters were not properly maintained over the  
6 last five years. We are addressing this by documenting our  
7 administrative procedures or whenever there are any board  
8 changes, be it somebody joins or a board member departs.

9 And part of that documentation will include  
10 instructions for how to properly store this historical  
11 roster and to update the new roster to make sure that we are  
12 maintaining those records appropriately.

13 And so, that was the only observation made.  
14 Otherwise, our documentation was well done, and we will be  
15 addressing just this one piece.

16 The other item that I had is actually about the  
17 April meeting. So, we've already identified that we will  
18 not have a quorum for our April 4th meeting, and so I would  
19 like to propose moving that to April 18th. But wanted to  
20 see if the Committee has alternative dates they would put  
21 forth, if the April 18th date does not work.

22 I'm seeing a lot of phones going.

23 (Laughter)

24 COMMITTEE MEMBER LUND: That is the Friday before  
25 a holiday weekend.

1 DR. RYKACZEWSKA: I'm hearing not a resounding yes  
2 to the 18th.

3 VICE CHAIR DICKEY: Sounds like it.

4 DR. RYKACZEWSKA: Is there an alternative date  
5 anyone would propose? The 25th?

6 CHAIR HESS: Does the 11th not work?

7 DR. RYKACZEWSKA: I can try to make the 11th work.  
8 I have a conflict.

9 CHAIR HESS: Okay, I do, too.

10 DR. RYKACZEWSKA: Okay.

11 CHAIR HESS: The 25th.

12 COMMITTEE MEMBER DINIS: If the 18th didn't work  
13 out, what about the 25th?

14 DR. RYKACZEWSKA: All right, then the new proposal  
15 is the 25th of April for our April meeting. Perhaps we  
16 could have a motion just to confirm that meeting date?

17 CHAIR HESS: Do we need to ask for public comment,  
18 first?

19 DR. RYKACZEWSKA: We do need to ask for public  
20 comment, first.

21 CHAIR HESS: Okay. If any -- if members of the  
22 public who are present would like to comment on our proposal  
23 to move the April 4th meeting to April 25th, now is your  
24 opportunity to comment.

25 DR. RYKACZEWSKA: And I am not --

1 MR. ZADROZNA: There are no public comments  
2 downstairs.

3 DR. RYKACZEWSKA: Thank you, Nick. And I am not  
4 seeing any on the Zoom.

5 CHAIR HESS: Okay. So, I move that we --

6 DR. RYKACZEWSKA: I think as Chair, you can't make  
7 a motion.

8 CHAIR HESS: All right. So, does anyone want to  
9 make a motion?

10 VICE CHAIR DICKEY: I'll meet that we meet next  
11 time on April 25th.

12 COMMITTEE MEMBER KURTURAL: I'll second it.

13 MS. ATIFEH: Okay, I'll start with Dr. Dinis?

14 COMMITTEE MEMBER DINIS: Approve.

15 MS. ATIFEH: Dr. Johnson?

16 COMMITTEE MEMBER JOHNSON: Approve.

17 MS. ATIFEH: Ms. Lund?

18 COMMITTEE MEMBER LUND: Approve.

19 MS. ATIFEH: Dr. Palacio?

20 COMMITTEE MEMBER PALACIO: Approve.

21 MS. ATIFEH: Dr. Ruiz?

22 COMMITTEE MEMBER RUIZ: Approve.

23 MS. ATIFEH: And Dr. Ventura?

24 COMMITTEE MEMBER VENTURA: Approve.

25 MS. ATIFEH: Okay, the motion passed.

1 DR. RYKACZEWSKA: Wonderful. Then, those are my  
2 administrative updates.

3 CHAIR HESS: Okay. I assume we're going on to  
4 subcommittee updates.

5 COMMITTEE MEMBER DINIS: Wait a minute. Wait a  
6 minute, I may not -- oh, it's April 25th, right.

7 DR. RYKACZEWSKA: That's correct.

8 COMMITTEE MEMBER DINIS: Okay, sorry.

9 CHAIR HESS: Subcommittee updates. Just to let  
10 everyone know that the Governor's Office has requested the  
11 Committee defer consideration of the proposed IPA  
12 regulations until our April meeting. So, we will not be  
13 discussing those today.

14 I don't know if there's any members of the public  
15 on who were anticipating that discussion, but that will not  
16 be happening at this meeting. And that's all the  
17 information we have about that.

18 We wanted to discuss the training policy. So, as  
19 everyone recalls, we have access now to some CITI training  
20 through, I think it's OHRP that puts on the CITI training.  
21 But we have access to a fair number of modules on the CITI  
22 framework.

23 And we're recommending that we're updating the  
24 policies and procedures to require that all new members  
25 complete the CITI training in the first six months of their

1 tenure on the board. So, I'll put that proposal out there  
2 and open it up for discussion.

3 COMMITTEE MEMBER LUND: Can I ask a question?

4 CHAIR HESS: Uh-hum.

5 COMMITTEE MEMBER LUND: What about existing  
6 members?

7 CHAIR HESS: Ideally, existing members would also  
8 be taking the training, but we haven't discussed like  
9 requirements for existing members. I think it's strongly  
10 encouraged that existing members would take advantage of  
11 these trainings.

12 I've started them. They're actually pretty full.  
13 I hadn't taken CITI training for, you know, a couple, like  
14 maybe five years.

15 But I don't think that we -- unless the -- unless  
16 the board feels strongly that we should require existing  
17 members to take the trainings.

18 COMMITTEE MEMBER LUND: So, I've taken them. I've  
19 finished doing them. And what I can say is the one, the big  
20 one is extremely full. There's information in there that we  
21 often discuss here and not everyone is on the same page.

22 And I truly believe that if we all took that  
23 training, that much of the discussion that we have wouldn't  
24 occur because we'd all be on the same page about what the  
25 requirements are and what we should be considering, and so

1 on, and so forth.

2 VICE CHAIR DICKY: Exactly.

3 COMMITTEE MEMBER LUND: So, for that reason I, you  
4 know, would put it out there that I think should -- and we  
5 sit on a board and people's lives are in our hands, as well  
6 as people's livelihoods. You know, the researchers and the  
7 people whose data, you know, we're here to oversee.

8 So, I personally would be in favor of requiring  
9 it. I know we're all volunteers and I know nobody has the  
10 extra time, but I found it helpful, and I think it would be  
11 helpful for all of us. So, that's my opinion.

12 The one training that I would say is not useful  
13 for board members is the information security training,  
14 because it's not really information security training. It's  
15 onboarding new people so that they don't leave their screens  
16 open with private data, and so on and so forth. It's the  
17 kind of training you would give a new employee.

18 The one that is also extremely useful is the IRB  
19 protocol review training. Everybody, I think, would benefit  
20 from that just in terms of what you consider, and how you  
21 consider it, and how we have those discussions. So, that's  
22 my two cents.

23 VICE CHAIR DICKY: So, if it's six months for new  
24 members, maybe a year for existing members.

25 COMMITTEE MEMBER VENTURA: And the certification,

1 the training is good for several -- is it one time and  
2 you're done? Because for researchers it's three years,  
3 right.

4 CHAIR HESS: That's a great question. I don't  
5 know what --

6 COMMITTEE MEMBER LUND: I don't know the answer to  
7 that question. I guess it would --

8 COMMITTEE MEMBER VENTURA: You usually get a  
9 certificate of completion, and it says, you know, three  
10 years from that date you complete it. And so, I wonder if  
11 it's the same for the IRB modules.

12 COMMITTEE MEMBER LUND: Yeah, I don't know the  
13 answer to that. I didn't look at my certificate of  
14 completion. You know, it generates it, but I didn't look.

15 COMMITTEE MEMBER VENTURA: Yeah.

16 COMMITTEE MEMBER LUND: So.

17 CHAIR HESS: We can look into that and then, you  
18 know, it's not something that I would think we would need to  
19 have board members do every three years. But one time,  
20 certainly, new board members, or just refreshers, you know,  
21 every once in a while.

22 COMMITTEE MEMBER LUND: If there are major  
23 changes. Like when I took my training, it was very  
24 interesting because when I started the training and when I  
25 finished the training there had been an administration

1 change. And so, there were a lot of pages on the training  
2 that said this training is under review pending changes.  
3 So, especially in the DEI section.

4 VICE CHAIR DICKY: DEI stuff.

5 COMMITTEE MEMBER LUND: So, I would say that if  
6 there are major changes that members would benefit from a  
7 refresher, but that I wouldn't require it.

8 VICE CHAIR DICKY: If they do another 2018  
9 update, or something like that, you know.

10 COMMITTEE MEMBER LUND: Yeah.

11 CHAIR HESS: It does look like it's three years.  
12 So, but, you know, that would be something that we could --  
13 that I don't think we would need to require it every three  
14 years. But as we say, just if there's updates.

15 But I mean I think it's reasonable if new members  
16 have six months, but existing members have a year to  
17 complete the training. I think, I agree, it's extremely --  
18 they are extremely useful.

19 So, does anyone else have any thoughts or --

20 COMMITTEE MEMBER DINIS: Yeah, I've done the  
21 training, too. But I think that in the refresher, then the  
22 refresher could be more selective. You know, like maybe  
23 just a few trainings that people have to do, you know, that  
24 are considered more important or something. Because it's a  
25 lot of hours to ask everybody to do every three years.

1 CHAIR HESS: Agreed. I think updates, like  
2 refreshers can be as needed. So, do you have any other  
3 thoughts? Any other thoughts from the remote board members?

4 COMMITTEE MEMBER DINIS: Well, I'm sorry, I kept  
5 saying -- maybe I was muted. Maybe in the required, every  
6 three years, would be like some of the models that everybody  
7 should do, and not like the whole 20 hours, your know.

8 CHAIR HESS: Oh, yeah. Great. But I think we're  
9 talking about not -- maybe not requiring board members to do  
10 like recertification every three years, but it can be as  
11 needed. So, the requirement would be the initial training.

12 COMMITTEE MEMBER VENTURA: For everyone.

13 CHAIR HESS: For everyone. And then, as needed  
14 beyond that. We could look into whether or not we would  
15 require the training again, should there be updates to the  
16 Common Rule. Okay.

17 VICE CHAIR DICKEY: Is this something we need to  
18 vote on?

19 CHAIR HESS: Yeah. So, first I'll open it up to  
20 public comment, if there are any members of the public that  
21 would like to comment on this.

22 MR. HENRY: Can I make a comment?

23 CHAIR HESS: Yes, please.

24 MR. HENRY: I'm sorry, I don't know how to raise  
25 -- my name is Stephen Henry, I'm a physician researcher.

1 And I would just say that the comments by the board member  
2 that people's lives are in their hands is very apt. And as  
3 I know that the researchers who apply to your Committee have  
4 to generally spend dozens and dozens of hours a year on  
5 these trainings, and I think it's really important, part of  
6 responsibility for anyone who, you know, chooses to  
7 volunteer to CPHS that they maintain regular review and  
8 training so that, like they said, everyone is on the same  
9 page. And you don't waste time in committees arguing about  
10 things because there's differences in knowledge about  
11 established federal, and state rules, and practices. Thank  
12 you.

13 DR. RYKACZEWSKA: Thank you.

14 CHAIR HESS: Thank you.

15 DR. RYKACZEWSKA: Any other public comments on the  
16 zoom? Not seeing any. Nick, any in person?

17 MR. ZADROZNA: No public comments in person.

18 DR. RYKACZEWSKA: Thank you, Nick.

19 CHAIR HESS: Do we have a motion? Does anyone  
20 want to make a motion?

21 VICE CHAIR DICKEY: Why don't you do the honors.

22 COMMITTEE MEMBER LUND: Okay. I move that CPHS  
23 adopt the policy that new members be required to take the  
24 initial CITI trainings within six months of becoming a  
25 member. And that existing members complete the CITI

1 trainings within one year from this meeting. And that the  
2 board will decide in the future when refreshers are  
3 necessary.

4 CHAIR HESS: That sounds good. Do we have a  
5 second?

6 VICE CHAIR DICKEY: I'll second.

7 CHAIR HESS: Okay.

8 DR. RYKACZEWSKA: And I'm just making sure that  
9 I've got this motion correctly. Just one moment.

10 VICE CHAIR DICKEY: So, is this something we'd put  
11 in the policies and procedures?

12 CHAIR HESS: Yeah. Do we want to include that in  
13 the motion that --

14 DR. RYKACZEWSKA: So, I have changed the CPHS  
15 policies and procedures. And that -- the last part of that  
16 motion, I'm so sorry.

17 COMMITTEE MEMBER LUND: And that the Committee  
18 will decide in the future when refreshers are necessary.

19 DR. RYKACZEWSKA: We're having all kinds of  
20 technical difficulties today. Thinking really hard about  
21 this motion. Here we go.

22 All right, I just want to make sure that I've got  
23 it captured. Moved that CPHS policies and procedures be  
24 changed, new Committee members complete the CITI training  
25 within six months of starting, of joining --

1 CHAIR HESS: From their appointment to the board.

2 DR. RYKACZEWSKA: That existing Committee members

3 take the training at least and that the Committee decides in

4 the future when refreshers are necessary.

5 COMMITTEE MEMBER LUND: Existing Committee members

6 take it within the next 12 months.

7 VICE CHAIR DICKY: Yeah, yeah.

8 DR. RYKACZEWSKA: Do I have that right, now?

9 COMMITTEE MEMBER LUND: Yeah.

10 VICE CHAIR DICKY: Yeah.

11 CHAIR HESS: Do we need to specify forward from

12 what date? From today.

13 COMMITTEE MEMBER LUND: It is the 7th of March.

14 CHAIR HESS: We had a second, correct?

15 MS. ATIFEH: Yes.

16 CHAIR HESS: Okay.

17 MS. ATIFEH: Okay, Dr. Dinis?

18 COMMITTEE MEMBER DINIS: Approve.

19 MS. ATIFEH: Dr. Johnson?

20 COMMITTEE MEMBER JOHNSON: Approve.

21 MS. ATIFEH: Ms. Kurtural?

22 COMMITTEE MEMBER KURTURAL: Approve.

23 MS. ATIFEH: Dr. Palacio?

24 COMMITTEE MEMBER PALACIO: Approve.

25 MS. ATIFEH: Dr. Ruiz?

1 COMMITTEE MEMBER RUIZ: Approve.

2 MS. ATIFEH: And Dr. Ventura?

3 COMMITTEE MEMBER VENTURA: Approve.

4 MS. ATIFEH: The motion passed.

5 CHAIR HESS: Okay, great.

6 VICE CHAIR DICKEY: Speaking of new members, are  
7 we going to talk about that?

8 CHAIR HESS: It wasn't on the agenda.

9 DR. RYKACZEWSKA: Yeah, it wasn't on the agenda.

10 CHAIR HESS: We are starting recruiting.  
11 Okay, we have -- can move on to review and  
12 approval of meeting minutes. We have three meetings for  
13 which we need to approve minutes.

14 So, we'll start with the October 4, 2024, board  
15 meeting. I ask if there's any feedback from the Committee  
16 on that, from those meeting minutes?

17 Hearing none, we will open for public comment. If  
18 there is any member of the public that would like to comment  
19 on the October 4, 2024, meeting minutes?

20 MR. ZADROZNA: No comments in person.

21 DR. RYKACZEWSKA: Thank you, Nick. And I'm not  
22 seeing any online.

23 CHAIR HESS: Okay. So, is there a motion to  
24 approve the October 4th meeting minutes?

25 COMMITTEE MEMBER VENTURA: I move to approve.

1 CHAIR HESS: Okay.

2 COMMITTEE MEMBER VENTURA: October 2024 meeting

3 minutes.

4 CHAIR HESS: Thank you.

5 VICE CHAIR DICKY: And I'll second.

6 CHAIR HESS: Thank you.

7 MS. ATIFEH: Dr. Dinis?

8 COMMITTEE MEMBER DINIS: Approve.

9 MS. ATIFEH: Dr. Johnson?

10 COMMITTEE MEMBER JOHNSON: Approve.

11 MS. ATIFEH: Ms. Kurtural?

12 COMMITTEE MEMBER KURTURAL: Approve.

13 MS. ATIFEH: Ms. Lund?

14 COMMITTEE MEMBER LUND: Approve.

15 MS. ATIFEH: Dr. Palacio?

16 COMMITTEE MEMBER PALACIO: Abstain. I was not

17 here.

18 MS. ATIFEH: Dr. Ruiz?

19 COMMITTEE MEMBER RUIZ: Approve.

20 MS. ATIFEH: The motion passed.

21 CHAIR HESS: Okay. Moving on to the November 1,

22 2024, Committee meeting. Is there any comment from the

23 Committee on those meeting minutes?

24 I'm not hearing any. Is there any public comment

25 from members of the public on the November 1, 2024, meeting

1 minutes?

2 MR. ZADROZNA: No comments in public -- or in

3 person.

4 CHAIR HESS: Okay. Are there any comments on the

5 chat or anything?

6 DR. RYKACZEWSKA: I am not seeing any on the chat.

7 CHAIR HESS: No. Okay, I will ask for a motion to

8 approve the November 1st meeting minutes.

9 COMMITTEE MEMBER KURTURAL: I'll make a motion to

10 approve. Is it November 4th -- I mean, I'm sorry, November

11 1, 2024, meeting minutes.

12 CHAIR HESS: Okay, thank you. Is there a second?

13 COMMITTEE MEMBER VENTURA: I'll second.

14 MS. ATIFEH: Dr. Dickey?

15 VICE CHAIR DICKY: Approve.

16 MS. ATIFEH: Dr. Dinis?

17 COMMITTEE MEMBER DINIS: Approve.

18 MS. ATIFEH: Dr. Johnson?

19 COMMITTEE MEMBER JOHNSON: Approve.

20 MS. ATIFEH: Ms. Lund?

21 COMMITTEE MEMBER LUND: Approve.

22 MS. ATIFEH: Dr. Palacio?

23 COMMITTEE MEMBER PALACIO: Approve.

24 MS. ATIFEH: Dr. Ruiz?

25 COMMITTEE MEMBER RUIZ: (No audible answer)

1 MS. ATIFEH: The motion passed.

2 CHAIR HESS: Thank you.

3 Okay, moving on to the December 6, 2024, meeting.

4 Are there any comments from Committee members on the meeting

5 minutes for December 6, 2024? I'm not hearing any.

6 Again, I will open it up to public comment. If

7 there are any members of the public who would like to

8 comment on the meeting minutes for December 6th?

9 MR. ZADROZNA: No comments in person.

10 DR. RYKACZEWSKA: Thank you, Nick. And I am not

11 seeing any on the Zoom.

12 CHAIR HESS: Okay. We need another motion.

13 COMMITTEE MEMBER VENTURA: I move to approve

14 meeting minutes from December 6, 2024.

15 CHAIR HESS: Second?

16 COMMITTEE MEMBER JOHNSON: I'll second.

17 VICE CHAIR DICKEY: Two seconds.

18 MS. ATIFEH: Who seconded?

19 CHAIR HESS: Dr. Johnson.

20 MS. ATIFEH: Okay. Dr. Dickey?

21 VICE CHAIR DICKEY: Approve.

22 MS. ATIFEH: Dr. Dinis?

23 COMMITTEE MEMBER DINIS: Approve.

24 MS. ATIFEH: Ms. Kurtural?

25 COMMITTEE MEMBER KURTURAL: Approve.

1 MS. ATIFEH: Ms. Lund?

2 COMMITTEE MEMBER LUND: Approve.

3 MS. ATIFEH: Dr. Palacio?

4 COMMITTEE MEMBER PALACIO: Approve.

5 MS. ATIFEH: Dr. Ruiz?

6 COMMITTEE MEMBER RUIZ: Approve.

7 MS. ATIFEH: Okay, motion passed.

8 CHAIR HESS: Okay. We are way ahead of schedule.

9 VICE CHAIR DICKY: We are.

10 CHAIR HESS: So, we could move on to the projects

11 that we'll be discussing, but I first want to see if Dr.

12 Michael Hoyt or Marcie Haydon are available and online.

13 DR. RYKACZEWSKA: I'm not seeing them having

14 joined, yet.

15 CHAIR HESS: Okay. Do we see any other project --

16 anyone from the other projects?

17 Okay. We will take a five-minute break while we

18 reach out to the researchers.

19 (Off the record at 9:00 a.m.)

20 (On the record at 9:15 a.m.)

21 DR. RYKACZEWSKA: We are unmuted, and I think we

22 can resume the meeting.

23 CHAIR HESS: Okay.

24 DR. RYKACZEWSKA: And see Dr. Michael Hoyt online.

25 Dr. Hoyt, are you there?

1 DR. HOYT: Yeah, so sorry to keep you guys  
2 waiting.

3 DR. RYKACZEWSKA: Okay, we're ahead of schedule so  
4 that's okay.

5 CHAIR HESS: Welcome Dr. Hoyt.

6 Dr. Dickey, do you want to --

7 VICE CHAIR DICKEY: Sure. Just a preface on this.  
8 Some of us have felt that we should maybe be doing full  
9 Committee reviews as amendments, particularly when there's  
10 significant changes in a project.

11 And so, I looked at this one and it's -- you know,  
12 it's creating a whole different link to the research. And,  
13 you know, had some significant changes, and that's how we  
14 got here.

15 After I looked at it more thoroughly, I don't  
16 think it's as big of an issue as I thought. But Dr. Hoyt  
17 and I have been communicating.

18 And so, Dr. Hoyt, I think it would be useful if  
19 you first summarized your original project and then  
20 summarized the changes that you're making to that project.

21 DR. HOYT: Yeah, great. Thank you so much. So,  
22 yeah, we -- the original project was a small pilot study  
23 which we were testing a behavioral cancer survivorship  
24 intervention for Latino young adults, who had testicular  
25 cancer. That was building off of other work we've done with

1     that population.

2             And so, we did that pilot study. And we then  
3     received some additional funding to extend this work. And  
4     so, that's why we put in the amendment to now do sort of a  
5     study two, to add on to this work, to test this same  
6     intervention with Latinx young men, who've had cancer.

7             So, moving this from just testicular to other  
8     cancer types, but with the same population and the same  
9     intervention, and adding a control arm to do this as a  
10    slightly larger pilot study.

11            So, the changes from study one, now, to sort of  
12    study two really are about those inclusion criterion. So,  
13    broadening them out across diagnoses.

14            Changing in the design, as I mentioned, just  
15    adding a attention mask control. So, the attention mask  
16    control is something we've used across many of our studies.  
17    It's basically just sort of supportive listening. So,  
18    masked in terms of the same amount of time and each of the  
19    conditions, one-on-one in the same format that they receive  
20    our intervention. So, meeting with one of our  
21    interventionists. And it's really just sort of nondirected  
22    supportive empathic listening.

23            VICE CHAIR DICKY: Can you describe the actual  
24    intervention for the group?

25            DR. HOYT: Yeah, the actual intervention is

1 focused around skill building and self-regulation, with a  
2 focus on pursuing goals after you've had cancer, motion  
3 regulation skills. It's a very brief intervention. It's  
4 six sessions that we deliver across two months.

5           They meet one-on-one, we deliver it like this, on  
6 Zoom. And there's some like between-session exercises that  
7 folks do. There's some like homework exercises and things  
8 like that. But it's really based off of what are your  
9 values after cancer? How have things shifted? How do you  
10 pursue goals? What are the skills that you might need? How  
11 do your emotions affect your goal pursuits and maybe get in  
12 the way? And different skills in that way.

13           VICE CHAIR DICKY: Great. Could you describe the  
14 recruitment, and then the screening, and --

15           DR. HOYT: Yeah. So, the recruitment mirrors  
16 exactly what we do in the pilot and what we do in some of  
17 our other studies. Recruiting through the California Cancer  
18 Registry, we obtain a list of potentially eligible folks  
19 from the Cancer Registry. We contact them by letter,  
20 telling them very briefly about the study and how to contact  
21 us. We follow up with them after a certain period of time.

22           We also do recruit through our clinics here at  
23 UCI, and will also be recruiting -- you know, we send out  
24 flyers and information about our study just through like  
25 cancer care organizations, and things like that, so that

1 people can contact us if they're eligible.

2           When we -- when they contact us, in the lab we do  
3 a screening, making sure they're eligible. There's some  
4 eligibility criteria, as you probably know. Probably the  
5 most notable one is they have to sort of score within --  
6 under a threshold in some of our screening questionnaires.  
7 So, there's two screening questionnaires.

8           One's related to sort of goal skills. And so, if  
9 they show that they could benefit from our intervention on  
10 that dimension, they could be eligible.

11           The other is the distress thermometer, so if they  
12 have some elevations in their overall distress, they may be  
13 eligible for the study as well.

14           VICE CHAIR DICKY: Great. Okay, I just want to  
15 make a comment that as in your previously approved study,  
16 those screening questions are administered before they go  
17 through a consent, right. You requested and were given a  
18 waiver of informed consent for those screening questions.  
19 So, he's requesting the same waiver for this arm.

20           The questions are pretty, not too -- I don't know  
21 if people have looked at them, they're not too sensitive.  
22 But I think it's -- the screening questions are mainly to  
23 determine that the person needs help. Right?

24           DR. HOYT: Yeah, yeah.

25           VICE CHAIR DICKY: That they're --

1 DR. HOYT: Yeah, we don't want to give  
2 interventions to people who just don't need interventions,  
3 yeah.

4 VICE CHAIR DICKY: So, they have to exhibit some  
5 difficulty dealing with their diagnosis.

6 And then, there's a consent process that takes  
7 place when they go ahead and do the intervention or the  
8 control.

9 One thing I questioned about was are you informing  
10 the participants how you got their name or how you contacted  
11 them? And I think you said it would be okay -- you haven't  
12 been telling them you got it from the Cancer Registry, but  
13 that you would be willing to change that?

14 DR. HOYT: Absolutely, yeah. Yeah, I think that's  
15 an important change.

16 VICE CHAIR DICKY: And that would go into the --

17 DR. HOYT: The initial recruitment contact letter.

18 VICE CHAIR DICKY: The initial contact, but not  
19 the consent. I mean because the consent would be different  
20 for different folks.

21 DR. HOYT: Yeah, exactly

22 CHAIR HESS: I thought they were required to tell  
23 participants that they got their information from --

24 COMMITTEE MEMBER LUND: There should be a CCR  
25 brochures, that's also a requirement.

1 CHAIR HESS: Yes.

2 VICE CHAIR DICKY: It's -- I'm not questioning  
3 that.

4 CHAIR HESS: No.

5 VICE CHAIR DICKY: In the past, this is how they  
6 -- they didn't have to reveal that.

7 But what we're hearing here is that you need to  
8 put it in the consent, as well as the contact letter.

9 COMMITTEE MEMBER LUND: I don't think that that's  
10 a requirement. What's a requirement is that when you --  
11 when you contact the people that you tell them that you got  
12 their contact information from CCR.

13 VICE CHAIR DICKY: Okay, so you're saying it  
14 doesn't have to be in the consent.

15 COMMITTEE MEMBER LUND: That would be my take.

16 VICE CHAIR DICKY: We often have it in the  
17 consent. But this is mixed because there's a lot of --  
18 probably most of your patients are not contacted through the  
19 Registry, is that right?

20 DR. HOYT: It's a mix, yeah. It's a mix. And,  
21 you know, it may be that one of our clinicians says, oh,  
22 this patient may be eligible, send them a -- please send  
23 them an information letter, right. And so, they wouldn't be  
24 Cancer Registry folks.

25 VICE CHAIR DICKY: I guess the data that we have

1 program review over is the Cancer Registry folks, right.

2 CHAIR HESS: Yeah, I think so.

3 COMMITTEE MEMBER LUND: And I wouldn't have a  
4 problem with a contact script that said something like, we  
5 either got your information from your physician or from the  
6 California Cancer Registry. I mean, you know, I --

7 VICE CHAIR DICKEY: Or, either, not actually say  
8 that they got it from the Cancer Registry.

9 COMMITTEE MEMBER LUND: Yeah, I would -- for me, I  
10 think it satisfies the requirement that they know the  
11 source. And if it could be either/or, that's okay with me,  
12 as long as they know what source it might have been.

13 CHAIR HESS: So, they wouldn't have to have two  
14 different contact letters for people who are recruited at  
15 the Registry versus --

16 COMMITTEE MEMBER LUND: Yes, that's what I would  
17 -- that's what I would say.

18 VICE CHAIR DICKEY: Okay, moving on. You know, I  
19 had questions about, you know, how you scored the screening  
20 questions, I couldn't figure out -- but I don't think we  
21 need to go into that. I think you know you're scoring them  
22 the right way.

23 DR. HOYT: Okay.

24 VICE CHAIR DICKEY: And I'd never heard the word  
25 "attention match controls", so you explained to me what that

1 means.

2 DR. HOYT: Yeah. It really just means that you're  
3 giving your control participants the same amount of  
4 attention. So, the same amount of time is maybe another way  
5 to say it. As opposed to, you know, usual care, where you  
6 really aren't giving them anything extra.

7 But attention match is not uncommon in sort of  
8 behavioral intervention study designs because if we give  
9 them nothing, chances are our intervention's going to look  
10 really good. But we won't know if it's because of the  
11 active ingredients of our intervention or just because we  
12 spent time with them.

13 And so, we have a control group that controls,  
14 basically, for just spending time face-to-face with them,  
15 without giving them the skills in the intervention component  
16 study that are in the other group.

17 VICE CHAIR DICKY: Do we have the script for the  
18 controls? I mean, what do you talk to them about?  
19 Football?

20 DR. HOYT: Yeah. It's very whatever they bring to  
21 those sessions. We have -- I mean we train our  
22 interventionists and, basically, they're meant to just do  
23 active listening. So, they use reflective listening  
24 techniques, empathic, you know, sessions with them. But the  
25 -- really, the content can be whatever the individual brings

1 to the session.

2 What they don't do is exercises, and coping skill  
3 training, and emotion regulation work. They don't do any of  
4 that.

5 VICE CHAIR DICKY: Okay, I open it up to the rest  
6 of the Committee for questions.

7 COMMITTEE MEMBER LUND: Having just finished the  
8 CITI training --

9 VICE CHAIR DICKY: You're dangerous now.

10 (Laughter)

11 COMMITTEE MEMBER LUND: Consent is not necessary  
12 for screening. So, we don't actually have to have a waiver  
13 of informed consent for screening. But what we can do is  
14 ask, especially if the screening questions are detailed, or  
15 intrusive, or sensitive, we can ask them to have a script to  
16 make sure that people are prepared for what they're to be  
17 asked.

18 But technically speaking, they don't need to have  
19 an informed consent process for screening, as long as it's  
20 just for screening.

21 VICE CHAIR DICKY: Yeah, and usually the  
22 screening is something, you know, on a demographics order,  
23 but these are questions that ask about how you're doing.  
24 So, it seems to me a little more sensitive.

25 COMMITTEE MEMBER LUND: Yeah. I'm not saying I

1 object. I'm just saying. I'm dangerous now.

2 (Laughter)

3 CHAIR HESS: Any other questions, comments from  
4 the Committee? No.

5 Are we ready for a motion?

6 VICE CHAIR DICKEY: I guess so. I move approval,  
7 one-year, minimum risk, with the proviso -- what is, it's  
8 conditional approval -- deferred approval.

9 CHAIR HESS: Deferred approval.

10 VICE CHAIR DICKEY: One-year, minimum risk with  
11 the changes in the recruitment letter to state that they're  
12 being recruited because they've been identified as having  
13 cancer, either through the California Cancer Registry or  
14 another -- another means. And the other means would be  
15 clinical contacts?

16 DR. HOYT: Yeah, so this is provider identified or  
17 self-referred.

18 VICE CHAIR DICKEY: Oh, okay.

19 DR. HOYT: So, self-referred, they wouldn't get  
20 the letter so, yeah.

21 VICE CHAIR DICKEY: Oh, okay. So, through the  
22 California Cancer Registry or your provider.

23 COMMITTEE MEMBER LUND: Is it one year? Since  
24 this is an amendment or is for the term of the study?

25 VICE CHAIR DICKEY: Well, that's true, amendments

1 are not full -- well, this is so big of a thing.

2 When is your renewal going to be? Do we know?

3 DR. HOYT: Uh, the (indiscernible) --

4 VICE CHAIR DICKY: Your continuing renewal.

5 DR. HOYT: That's a good question, I don't know.

6 DR. RYKACZEWSKA: I thought it was not in -- I was

7 not anticipating that question, sorry.

8 CHAIR HESS: I just saw it and --

9 DR. RYKACZEWSKA: It is August 1st, 2025.

10 VICE CHAIR DICKY: Oh, okay. So, it's off a

11 little ways. We probably don't want to reset the whole --

12 okay, so it's not for one year. We're approving the

13 amendment.

14 DR. RYKACZEWSKA: Approval of amendment. Okay,

15 let me share a screen just to make sure I've got the motion

16 correctly. So, this will be motion six.

17 VICE CHAIR DICKY: And with review by myself as a

18 subcommittee.

19 Second?

20 CHAIR HESS: Second?

21 COMMITTEE MEMBER KURTURAL: I'll second.

22 DR. RYKACZEWSKA: Okay, here we go. So, we have a

23 second by Ms. Kurtural.

24 All right, and Dr. Hess?

25 CHAIR HESS: No, do I vote?

1 VICE CHAIR DICKEY: No.

2 DR. RYKACZEWSKA: No. Thank you.

3 Dr. Dickey, you --

4 VICE CHAIR DICKEY: I seconded it, so -- I mean, I  
5 made it.

6 DR. RYKACZEWSKA: Dr. Dinis?

7 COMMITTEE MEMBER DINIS: Approve.

8 DR. RYKACZEWSKA: Dr. Johnson?

9 COMMITTEE MEMBER JOHNSON: Approve.

10 DR. RYKACZEWSKA: Ms. Kurtural seconded.  
11 Ms. Lund?

12 COMMITTEE MEMBER LUND: Approve.

13 DR. RYKACZEWSKA: Dr. Palacio?

14 COMMITTEE MEMBER PALACIO: Approve.

15 DR. RYKACZEWSKA: Dr. Ruiz?

16 COMMITTEE MEMBER RUIZ: Approve.

17 DR. RYKACZEWSKA: And Dr. Ventura?

18 COMMITTEE MEMBER VENTURA: Approve.

19 DR. RYKACZEWSKA: All right, the motion has  
20 passed.

21 VICE CHAIR DICKEY: I sort of want to ask the  
22 Committee, is this an appropriate thing to come back to the  
23 full Committee?

24 COMMITTEE MEMBER KURTURAL: Yeah, I think so  
25 because it's such an expansion of the project.

1 COMMITTEE MEMBER VENTURA: As you said, it's a new  
2 arm.

3 VICE CHAIR DICKY: A new arm, yeah.

4 COMMITTEE MEMBER VENTURA: It kind of changes from  
5 the original design. I think that's appropriate.

6 VICE CHAIR DICKY: Yeah, okay. Good.

7 COMMITTEE MEMBER KURTURAL: And I don't think we  
8 get that many of these where it's like third and some. We  
9 only have three on the agenda.

10 VICE CHAIR DICKY: I know. Exactly, we wouldn't  
11 have much to talk about today, if we didn't do it.

12 CHAIR HESS: All right. Okay, Dr. Hoyt, if you're  
13 still on, thank you very much. You should be getting --

14 DR. HOYT: Thank you all so much.

15 CHAIR HESS: -- contact from us shortly. Thank  
16 you.

17 DR. RYKACZEWSKA: And we are reaching out to the  
18 next research teams. So, that's why we might need to take a  
19 second break, just to reach out to the team.

20 CHAIR HESS: Okay, we'll take --

21 DR. RYKACZEWSKA: Five minutes.

22 CHAIR HESS: -- five minutes.

23 (Off the record at 9:33 a.m.)

24 (On the record at 9:40 a.m.)

25 CHAIR HESS: Okay. Welcome back, everyone. We

1 are ready to talk about our next project.

2 I believe we have Dr. Jennifer Tsui, who has  
3 joined us. Yes. Is there anyone else from your research  
4 team, Dr. Tsui?

5 DR. TSUI: Hi everyone. Yes, thanks for putting  
6 our project on the agenda today. I think my research team  
7 is just joining now. We -- I think here that you all are  
8 way ahead of schedule. Our window was 10:00 to noon. So,  
9 I'm hoping they can join us momentarily. I see Emily is on,  
10 now.

11 CHAIR HESS: Do you want to go ahead.

12 COMMITTEE MEMBER LUND: Sure. Hi. Good morning,  
13 is it Doctor -- is it Tsui or Tsui?

14 DR. TSUI: It's Tsui.

15 COMMITTEE MEMBER LUND: Great. Apologize.

16 DR. TSUI: Thanks for asking.

17 COMMITTEE MEMBER LUND: So, Hi. I'm Laura.

18 DR. TSUI: Hi, Laura, nice to see you in person,  
19 sort of.

20 COMMITTEE MEMBER LUND: Yes.

21 DR. TSUI: Or over Zoom or, you know, a face to  
22 the name, as always.

23 COMMITTEE MEMBER LUND: So, I just wanted to let  
24 the board know that this is been heard as an amendment. We  
25 previously approved this project. But I brought it to the

1 board because it's a significant amendment. When we  
2 originally reviewed this project, they had planned to do the  
3 12-month follow up, but they did not have any of the  
4 associated materials, consent forms, and questionnaires, and  
5 so forth, recruitment materials and that kind of thing.

6 So, the amendment is to add the 12-month follow up  
7 to the originally approved study.

8 And what I'd like to ask is if Dr. Tsui would  
9 introduce anybody else who's on her team, and then explain  
10 the amendment to the board.

11 DR. TSUI: Sure. So, hi, everyone. I'm Jennifer  
12 Tsui. I've mentioned earlier I'm Associate Professor at the  
13 University of Southern California. I am one of the MPIs on  
14 this NIH-funded study. And as Ms. Lund had mentioned, this  
15 is an amendment to primarily address edits we were trying to  
16 make around the 12-month follow-up survey.

17 I'd like to introduce one of our project  
18 directors, Emily Dang. And I can have Emily introduce  
19 herself really quickly.

20 MS. DANG: Hi, everyone. I'm Emily Dang. Thank  
21 you for the introduction Dr. Tsui. I am the Researcher  
22 Coordinator at USC, and I work really closely with the other  
23 project coordinator at the Columbia University site.

24 DR. TSUI: And then, just a brief summary, and  
25 first I want to say thank you so much for putting this

1 project on the agenda today, and for the reviewers,  
2 primarily Ms. Lund, for going back and forth with us so many  
3 times over the last -- Laura, has it been 12 months, 18  
4 months.

5 COMMITTEE MEMBER LUND: Yeah.

6 DR. TSUI: A great back and forth around this  
7 study. And I can do a 30-second overview of the amendment  
8 items we're trying to discuss.

9 So, this study is based in two sites. It is  
10 recruiting cervical cancer patients from both the New Jersey  
11 State Cancer Registry and the Los Angeles Cancer  
12 Surveillance Program.

13 The amendment here, and the reason we're going  
14 through CPHS is because we recruit through LACSP.

15 The three amendment items that we have submitted  
16 and described in this amendment is, one, the 12-month  
17 follow-up survey and all the associated recruitment  
18 documents. They so far are submitted only in English. They  
19 have been reviewed thoroughly by our research team, as well  
20 as our Community Advisory Board, which sits nationally.

21 And some of the measures in this amendment -- or  
22 in the 12-month survey overlap with our baseline survey.  
23 Some of our baseline survey items have been removed because  
24 we no longer need to follow those items up in the 12-month,  
25 and there are new 12-month items that have been added.

1           In addition to this major amendment, the other two  
2 items include an update to our baseline survey, itself. We  
3 had previously been approved with some minor edits to our  
4 English version of the baseline survey. That occurred on  
5 December 23rd. And we are just submitting the Chinese and  
6 Spanish translated versions of those edits to our baseline  
7 survey.

8           And then, the last and third minor edit to the  
9 amendment is that in our original protocol we said that  
10 registry staff would be the personnel on the team to request  
11 medical records from physicians associated with these cancer  
12 cases. We're expanding that, just due to project resources,  
13 logistics, but also including appropriate training. We are  
14 also including research staff as part of the process for  
15 recruiting or contacting physicians for the medical records  
16 we need in phase two of the study.

17           I would say that's the overview. I'm happy to  
18 answer any questions or provide updates to the study, if  
19 that will help make any of the board decisions or answer any  
20 questions.

21           COMMITTEE MEMBER LUND: Great. Thank you, Dr.  
22 Tsui.

23           And just for the board, I had a few questions and  
24 comments on some things that were minor. Dr. Tsui made  
25 changes, just some of the consent form language, and

1 answered my questions. So, I don't have any concerns to  
2 bring to the board about this amendment.

3 I thought that the follow-up questionnaire was  
4 appropriate. I didn't see anything in it that I was  
5 concerned about or that would be unnecessary. And the  
6 consenting process and the consent form look good to me.

7 So, I don't have any additional comments about  
8 this study, and I would open it up to the board for any  
9 comments or questions they may have.

10 No. Okay. And public comment?

11 CHAIR HESS: Did we ask for public comment on the  
12 previous project?

13 COMMITTEE MEMBER LUND: No.

14 CHAIR HESS: Okay. Okay, well, if there's no  
15 additional comments from the board, do we have a motion?

16 COMMITTEE MEMBER LUND: We should really ask for  
17 public comment. Are there public comments on this?

18 CHAIR HESS: Do we have any comments from the  
19 public?

20 DR. RYKACZEWSKA: I am not seeing any online.  
21 Nick, any in person? Nich, you're muted, if you're  
22 speaking. From my understanding, there are no in-person  
23 attendees, so I'm going to say no in-person.

24 CHAIR HESS: Okay. No public comment.

25 COMMITTEE MEMBER LUND: All right. Then, I move

1 to approve the amendment. It's approved and not deferred  
2 approval because I didn't hear any additional comments above  
3 and beyond the changes that have already been made.  
4 Approved consistent with the time of the study. So, we're  
5 not adding any additional time. The amendment is just  
6 approved. Okay.

7 VICE CHAIR DICKY: It can't be that simple.

8 (Laughter)

9 DR. TSUI: Yeah, this is the simplest we've ever  
10 seen. So, just glad it turned out this way. Kudos to Emily  
11 for being great at coordinating all of this.

12 COMMITTEE MEMBER LUND: So, we need a second and a  
13 vote.

14 COMMITTEE MEMBER VENTURA: I'll second.

15 VICE CHAIR DICKY: I'll second. Oh, I'm sorry,  
16 you got it.

17 MS. ATIFEH: Okay. Dr. Dickey?

18 VICE CHAIR DICKY: Approved.

19 MS. ATIFEH: Dr. Dinis?

20 COMMITTEE MEMBER DINIS: Approve.

21 MS. ATIFEH: Dr. Johnson?

22 COMMITTEE MEMBER JOHNSON: Approve.

23 MS. ATIFEH: Ms. Kurtural?

24 COMMITTEE MEMBER KURTURAL: Approve.

25 MS. ATIFEH: Dr. Palacio?

1 COMMITTEE MEMBER PALACIO: Approve.

2 MS. ATIFEH: Dr. Ruiz?

3 COMMITTEE MEMBER RUIZ: Approve.

4 MS. ATIFEH: Okay, the motion passed.

5 CHAIR HESS: Great. Thank you, Dr. Tsui.

6 DR. TSUI: Okay, do you need any other comments

7 from us or anything else?

8 COMMITTEE MEMBER LUND: No. You'll get a letter

9 that this was approved. But you've already made the

10 changes, so there won't be any additional changes requested

11 in that letter.

12 DR. TSUI: Okay, great. Thank you so much.

13 MS. DANG: Thank you.

14 DR. TSUI: Have a great rest of your meeting, I

15 hope it all goes just as quickly.

16 (Laughter)

17 DR. RYKACZEWSKA: All right, and Dr. Schleider.

18 CHAIR HESS: Yeah. Okay, do we have Dr.

19 Schleider?

20 DR. RYKACZEWSKA: Uh-hum.

21 CHAIR HESS: Okay, who's project, Dr. Ventura's.

22 COMMITTEE MEMBER VENTURA: Yep. Good morning, Dr.

23 Schleider, is that the right pronunciation?

24 DR. SCHLEIDER: Yes.

25 COMMITTEE MEMBER VENTURA: Great.

1 DR. SCHLEIDER: You got it on the first time.

2 COMMITTEE MEMBER VENTURA: Thank you. And can you

3 please introduce any of your other team members on the call?

4 DR. SCHLEIDER: So, I don't see any of them here.

5 I think we were scheduled to have a call time that was a

6 little bit later than this, so I probably beat them. So,

7 it's just me today.

8 COMMITTEE MEMBER VENTURA: Okay, we're okay to --

9 okay.

10 If you can, Dr. Schleider, please provide the

11 Committee a few -- a brief summary of your proposed project

12 and then we'll go from there.

13 DR. SCHLEIDER: Absolutely. So, I have some

14 slides, if that would be helpful, but I can also just chat.

15 What would be preferable?

16 VICE CHAIR DICKEY: Whatever she prefers.

17 COMMITTEE MEMBER VENTURA: Yeah, whatever you

18 prefer. If you have slides, you can share them.

19 DR. SCHLEIDER: I'll go ahead and share the

20 slides, just so I remember not to miss anything at all.

21 DR. RYKACZEWSKA: And Dr. Schleider, just as a

22 housekeeping, if you could please email me those slides

23 afterwards, so that we can provide them to the public as

24 well.

25 DR. SCHLEIDER: Of course. Of course. All right.

1 All right, does that work?

2 DR. RYKACZEWSKA: Absolutely.

3 DR. SCHLEIDER: All right. Well, thank you so  
4 much for your time today and for the careful review you've  
5 already provided for our proposed project.

6 I'm Jessica Schleider. I'm an Associate Professor  
7 of Medical Social Sciences, Pediatrics, and Psychology at  
8 Northwestern University in Chicago.

9 And I'm collaborating with Kooth, a digital mental  
10 health company, who has a contract with the state to deploy  
11 their app, Soluna, across the state, to lead an analysis of  
12 the implementation of this digital mental health app, which  
13 is currently freely available to use across California.

14 And particularly, my lab studies single-session  
15 interventions, which are mental health supports that  
16 intentionally involve single-session encounters and make the  
17 most impact with that encounter.

18 So, this is one of the few digital mental health  
19 apps out there that include single-session components.

20 So, we're trying to understand the effects of  
21 those single-session components, as well as the overall  
22 effects of the app for California young people who access  
23 it.

24 I'm going to skip over some slides just about our  
25 lab but, really, we're to talk about the project with Kooth.

1 But in short, we are a team of 30 investigators here at  
2 Northwestern, cross-disciplines, that design, test, and  
3 disseminate brief barrier pre-interventions to reduce mental  
4 health problems at scale.

5 Which is the reason we're so excited about working  
6 with Kooth on this evaluation project, because they're app  
7 really does fall into that brief barrier free.

8 And I'm just going to skip over some other things  
9 about our lab.

10 So, what we're going to be doing in this project  
11 and what we're proposing to do is to evaluate the  
12 accessibility, impacts and added value of Soluna's single-  
13 session coaching option, which is one of several different  
14 digital mental health tools on the app, in combination with  
15 Soluna's other supports.

16 So, we're going to measure young people's use of  
17 the Soluna app. We're going to collect data on their  
18 emotions, thoughts and wellbeing, as well as the  
19 demographics. These outcomes are all really critical, not  
20 just to understanding the effects of Soluna and its  
21 components on students, but also to parents, teachers and  
22 policymakers who may want to make decisions on Soluna's use  
23 in the future for California students.

24 And young people, we're recruiting between 250 and  
25 500 young people. They'll be compensated up to \$30 for

1 their effort on the study, which includes a pre -- a  
2 baseline assessment, and then a one- and three-month follow-  
3 up assessment to track how they're doing over time.

4 Participants will be ages 14 to 17. These young  
5 people across California all already have access to the  
6 Soluna app through the state's investment. They'll have  
7 English proficiency, have access to the internet. They will  
8 live in California. And they'll have the capacity to  
9 consent assessment that we've used in many of our previous  
10 digital mental health studies for young people, to evaluate  
11 low risk digital mental health tools that are freely  
12 available to use.

13 They will ask youth to evaluate whether they are  
14 able to consent independently to take part in the study.

15 What they will be asked to do in the study? They  
16 will be asked to answer multiple choice questions about  
17 potential risks of participating and what happens if they no  
18 longer want to participate.

19 And the way the (indiscernible) is extremely  
20 important for research like this, because we know that  
21 without this kind of waiver youth would be systematically  
22 excluded from participating in either resources that could  
23 help them, or other kinds of -- or participating in studies  
24 like this, simply because they may not be able to disclose,  
25 or it may not be safe to disclose mental health concerns to

1 their families.

2 This is a quick summary of all of the data that  
3 we're going to be collecting through voluntary surveys for  
4 study participants. I'm happy to go through any of this in  
5 detail, although it's outlined in the proposal.

6 We're going to be collecting their feedback and  
7 demographics.

8 All of these items and surveys will be conducted  
9 through Qualtrics surveys, which will be offered to use in  
10 links that they receive through the Soluna app that they  
11 already use and have access to.

12 Our hypotheses for our study are youth with access  
13 to Soluna will show reductions in overall stress across a  
14 three-month follow-up period. That students with access to  
15 Soluna will show reductions in depression, anxiety,  
16 hopelessness, mental health stigma, and loneliness, as well  
17 as well as increases in perceived social support and quality  
18 of life.

19 That youth will show similar benefits to Soluna  
20 regardless of their individual backgrounds or treatment  
21 histories.

22 We predict that more engagement with Soluna, on  
23 more occasions, will predict larger improvements in the  
24 outcomes noted in hypotheses 1A and 1B.

25 And we predict that students will find both

1 individual single-sessions and the overall platform to be  
2 accessible and helpful to their wellbeing.

3           So, alongside this Qualtrics data collection,  
4 we've already gotten approval from the state to pursue this  
5 secondary analysis, or we've gotten a data sharing agreement  
6 approved with the state, rather.

7           So, we're also interested in -- because, you know,  
8 for the Qualtrics survey we're not going to be able to  
9 detect users individual patterns of engaging with Soluna  
10 itself, we'll just be asking youth to self-report their  
11 engagement.

12           We're also going to be examining secondary data  
13 from 3,500 to 4,500 newly registered users of Soluna during  
14 the project period. All of them, through the Soluna app,  
15 have previously affirmed that, you know, it's okay to use  
16 their data for secondary research purposes.

17           And this data will all be anonymous. So, we will  
18 not be linking this data to the data we collect through the  
19 Qualtrics survey. This is a separate and complementary  
20 secondary analysis effort to better understand how people  
21 overall are using Soluna's app.

22           And we'll be examining uptake in patient and  
23 accessibility. And these are not Medi-Cal data from DHCS.  
24 However, the data that we'll use is specified to be owned by  
25 a contract by DHCS. And so, we've already applied for and

1 have received approval from DRC for security to use this.

2 And this is just a quick description of the data  
3 components that will be included in the secondary anonymous  
4 data analysis which, again, I'm happy to share more about in  
5 detail, if you like.

6 Recruitment. All recruitment will happen through  
7 Soluna's platform. Within Soluna's platform, students will  
8 receive a message that informs them about the study. People  
9 who click on the message will be taken to a webpage on  
10 Qualtrics to determine eligibility. If they're eligible,  
11 they'll proceed to the baseline survey, which will include  
12 all the surveys I already talked about earlier.

13 Participants who are in the study will receive --  
14 be eligible to receive a \$10 gift card after completion of  
15 each of the three surveys. So, up to \$30 across a baseline,  
16 one-month, and three-month surveys. And gift cards will be  
17 sent to youth by email.

18 And it's a minimal risk study. And participants  
19 will receive their gift cards within ten days of  
20 participating.

21 This is, as I said, a minimal risk study.  
22 Participants may feel potential discomfort because of the  
23 length and content of the questions. But they're told  
24 explicitly they don't have to answer anything they do not  
25 want to answer. And that they can skip any questions at any

1 time.

2 We are asking about suicidal ideation over the  
3 past month. In certain surveys, I'm a clinical psychologist  
4 and my team are all trained in risk assessment and response  
5 of adolescents. That's the primary focus of our research in  
6 our lab overall.

7 I'm happy to go over the risk protocol that we've  
8 detailed in the application, if it would be helpful, or just  
9 answer questions if any remain, given that we've been back  
10 and forth a little bit about clarifying some of the  
11 features.

12 And these are just some details about, you know,  
13 summarizing the risks and benefits of the study. Really,  
14 just hitting on the points that this is going to be -- this  
15 study is going to be safe for Soluna users, all measures are  
16 validated. And they are going to be helpful for helping us  
17 understand how Soluna is benefitting California young  
18 people.

19 The privacy of the information is detailed early  
20 in the protocol that we submitted.

21 This study will not affect the availability of  
22 Soluna to anybody who already had access to it.

23 And there are these benefits. So, Soluna users  
24 can receive small gift cards, and they may enjoy even  
25 answering some of the survey questions.

1 I'm happy to discuss data protections. This  
2 protocol that we've submitted to you, the identical protocol  
3 has already been approved by the Northwestern University  
4 IRB. But we have the standard data protections in there  
5 that we would use for any project.

6 And I'm more than happy to take any questions you  
7 have about the protocol or our responses to your questions.  
8 Thank you for your attention.

9 COMMITTEE MEMBER VENTURA: Thank you for that  
10 explanation to the Committee.

11 I reviewed this protocol several times, just to  
12 try to make sure I understood all the components. But I  
13 will start with the issue that gave me most concern --

14 DR. SCHLEIDER: Okay.

15 COMMITTEE MEMBER VENTURA: -- which was the waiver  
16 for parental informed consent.

17 DR. SCHLEIDER: Okay.

18 COMMITTEE MEMBER VENTURA: Because this is a study  
19 with minors, 14 to 17, it just gave me pause. And they're  
20 asking questions about suicide ideation and other mental  
21 health questions. There are some sensitive questions, you  
22 know, regarding sexual orientation and gender identification  
23 in the surveys. And so, they're sensitive topics.

24 And so, I just want to ask the other Committee  
25 members for their input as far as the request for waivers

1 for parental consent because of the nature of this research.

2 DR. SCHLEIDER: And I'm more than happy to share  
3 why we prioritize this in 100 percent of identical mental  
4 health research with adolescents that we conduct.

5 But it's obviously a topic that deserves  
6 discussion.

7 COMMITTEE MEMBER LUND: So, the Committee is going  
8 to get tired of me, because I'm going to say I just finished  
9 the CITI training.

10 (Laughter)

11 COMMITTEE MEMBER LUND: That may speak to this in  
12 part. First, parents cannot give consent, they can only  
13 give permission. So, that's, I think an important  
14 distinction about whether parental permission should be  
15 required for these individuals to participate in the study.

16 And I think that's a real question given the  
17 sensitive nature of the topics that are being covered.

18 However, also one of the things that's raised in  
19 the CITI training is, does it actually disadvantage the  
20 group being studied to require parental permission here.

21 I think it would not be feasible to conduct this  
22 research if parental permission were required. I think a  
23 lot of folks would not be willing to participate if they had  
24 to tell their parents that they were accessing these  
25 services, which I think is something that we have to, as a

1 Committee, consider.

2           So, you would have -- you would not, I think,  
3 recruit broadly, or as broadly if you made this a  
4 requirement of the study.

5           And are the participants, themselves, harmed if  
6 parental permission is not sought. And I don't think they  
7 are. They're already accessing this service without  
8 parental permission, as I understand it.

9           DR. SCHLEIDER: Correct.

10           COMMITTEE MEMBER LUND: So, it just means that  
11 they wouldn't be able to participate in the study if you  
12 added this additional burden of requesting parental  
13 permission.

14           So, I just throw that out to the Committee to  
15 consider whether or not we should waive the parental  
16 permission and to enable more people from this group to  
17 participate in the research.

18           COMMITTEE MEMBER KURTURAL: I have a question  
19 about the app. The law on the consent side for mental  
20 health service side, it's very particular in California on  
21 -- and I know we're talking about research, but I just want  
22 to understand, you know, how are they getting to the app  
23 initially.

24           So, what type of criteria or screening does the  
25 app do for a determination that a child is mature enough,

1    which is what the code requires for 12 and older, they have  
2    to show that the child is mature enough to receive services  
3    on the app.

4               And then, that kind of relates back to the  
5    question of are they children under the Common Rule, you  
6    know, which ties into the research.

7               But if you could kind of explain more about that  
8    analysis and maybe that analysis is taking place when they  
9    sign up for the app before they -- you know, add that's  
10   already done and --

11              DR. SCHLEIDER:  Yeah.  So, it's not available to  
12   young people below a certain age, I believe either 13 or 14.  
13   But, you know, in compliance with that law that you're  
14   talking about.

15              But Soluna is not designed as a treatment or a  
16   service, so to speak.

17              COMMITTEE MEMBER KURTURAL:  Okay.

18              DR. SCHLEIDER:  It's designed as a support that  
19   anybody could use, which is a little bit different from a  
20   traditional mental health service.

21              So, it's proving that all youth could benefit from  
22   the coping skills and activities that are included within  
23   the app.

24              But when, at the time of onboarding, there's a  
25   similar kind of series of questions that we ask to determine

1 competence to provide consent, that determine whether or not  
2 somebody understands what this is, what it provides and what  
3 it doesn't provide, that it doesn't replace, you know, a  
4 therapist and other pieces. So, those questions are built  
5 in, as I understand it, to the onboarding process of Soluna,  
6 and if they're under a certain age they cannot access it,  
7 anyway.

8 COMMITTEE MEMBER KURTURAL: Okay. I think I would  
9 want to know more about that, I mean personally, as what  
10 type of screening is going on, on the front end to know --

11 DR. SCHLEIDER: Sure.

12 COMMITTEE MEMBER KURTURAL: -- that -- you know, I  
13 do think that it's interesting that you're defining it not  
14 as a mental health service to receive counseling. So, what  
15 is it, you know?

16 DR. SCHLEIDER: It offers many different things  
17 for folks at different levels is how I believe Kooth would  
18 describe the app.

19 But this is something that the state has  
20 sanctioned of being available to all youth and they will  
21 continue to access it, regardless of the study.

22 COMMITTEE MEMBER KURTURAL: Yeah, I'd want to see  
23 that. When you say the state has sanctioned it, like what,  
24 is it in law, like literally or, you know, to allow this app  
25 to move forward. Or like where is the authority coming

1 from, I'm just curious?

2 DR. SCHLEIDER: It's a contract with the state  
3 that Soluna has to make this part of sort of their mental  
4 health initiative --

5 COMMITTEE MEMBER KURTURAL: Okay.

6 DR. SCHLEIDER: -- of making sure care is  
7 accessible to all. So, it's a hundred percent funded and  
8 backed by the State of California to make this available to  
9 all California youth.

10 I would suggest asking Kooth, since I'm an expert  
11 in the study protocol, with respect to, you know, if there  
12 are particular questions about their contract with the  
13 state.

14 But I do know that regardless of whether this  
15 study occurs, students or youth across the state will  
16 continue and already do have access to Soluna.

17 COMMITTEE MEMBER KURTURAL: Yeah. Yeah, I mean, I  
18 just -- I feel like I need more information like about it,  
19 about that to know what type of screening. And what type of  
20 screening are you doing on the research side? I mean --

21 DR. SCHLEIDER: Capacity to consent. Again, we're  
22 not requiring anybody to have a particular profile or  
23 diagnosis.

24 COMMITTEE MEMBER KURTURAL: Okay.

25 DR. SCHLEIDER: And I can pull up the criteria for

1 inclusion, which are the other things --

2 COMMITTEE MEMBER KURTURAL: That would be helpful.

3 DR. SCHLEIDER: -- that we assess --

4 COMMITTEE MEMBER KURTURAL: Okay.

5 DR. SCHLEIDER: -- to determine eligibility for

6 the study.

7 COMMITTEE MEMBER KURTURAL: Do you mind if we look

8 at that?

9 DR. SCHLEIDER: Sure.

10 COMMITTEE MEMBER VENTURA: Sure.

11 COMMITTEE MEMBER KURTURAL: Okay.

12 DR. SCHLEIDER: Let me just go back to that slide.

13 So, we require that folks are between the ages of 14 to 17.

14 We ask them to attest that they're proficient in English.

15 They must have access to the internet, which if they're

16 accessing Soluna, they have access to the internet.

17 COMMITTEE MEMBER KURTURAL: Right.

18 DR. SCHLEIDER: They must live in California. And

19 they must pass the capacity to consent assessment.

20 So, it's designed to be representative of all of

21 the users who are already using Soluna, the app.

22 CHAIR HESS: That -- oh.

23 VICE CHAIR DICKEY: No, you go ahead.

24 CHAIR HESS: I'm looking at your consent and like

25 my understanding is that as minors they cannot consent, they

1 can only assent. So, yeah, at the very least the consent  
2 form would need to be changed to an assent form.

3 And I think some of the language is a little high.  
4 And I think that for especially youth who may -- yes, they  
5 may have the capacity to assent, but whether or not they  
6 really understand how their data are going to be used, I  
7 think it will be beneficial in the assent form to have a bit  
8 more explanation of what the study is about and how their  
9 data is going to be used. I don't know, if anybody agrees  
10 with that.

11 COMMITTEE MEMBER VENTURA: More details.

12 CHAIR HESS: Yeah.

13 COMMITTEE MEMBER VENTURA: More details. I agree.

14 VICE CHAIR DICKEY: Well, how is the capacity to  
15 assent evaluated?

16 DR. SCHLEIDER: They have to get all the questions  
17 right. It's a multiple choice.

18 VICE CHAIR DICKEY: Unfortunately, I didn't look  
19 at the questions.

20 COMMITTEE MEMBER VENTURA: So, they ask like, you  
21 know, are you going to participate in groups. And it's like  
22 if they say -- if they answer incorrectly, it's like --  
23 basically, they're quizzed on the consent form information.

24 VICE CHAIR DICKEY: Oh, what's in the assent form.

25 COMMITTEE MEMBER VENTURA: Yeah.

1 DR. SCHLEIDER: Yes, exactly.

2 COMMITTEE MEMBER VENTURA: That's the capacity to  
3 understand --

4 VICE CHAIR DICKY: Where the capacity to  
5 understand is from.

6 COMMITTEE MEMBER VENTURA: Yeah. Not, again,  
7 understanding how their data will be used, which I think we  
8 can ask for a little bit more explanation.

9 I asked to include, you said the surveys will take  
10 15 to 30 minutes, but in total I want to see like, you know,  
11 before they agree to participate in research they have to  
12 understand that there will be baseline, one-month, and  
13 three-month surveys. So, in total their commitment is maybe  
14 an hour and a half or two hours of their time. So, very,  
15 just spelling it out very clearly from the beginning what  
16 they're being asked to participate in, I think would help.

17 DR. SCHLEIDER: Sure.

18 COMMITTEE MEMBER VENTURA: Is the --

19 DR. SCHLEIDER: And given that each survey is, you  
20 know, brief, I don't believe it would be two hours.

21 VICE CHAIR DICKY: So, if they're identified at  
22 risk for suicide, or something like that, or harming  
23 themselves or somebody else --

24 DR. SCHLEIDER: Yes. Yeah, that would be outside  
25 of the study participation, but yeah.

1           VICE CHAIR DICKEY: Right. But they know that  
2 before they participate, that you're going to notify their  
3 parents and report the --

4           DR. SCHLEIDER: That is in the forms that they  
5 have to agree to, yes.

6           VICE CHAIR DICKEY: That's the biggest issue for  
7 me.

8           COMMITTEE MEMBER VENTURA: Well, one of my  
9 questions was, so the youth provide a parental contact  
10 information.

11          VICE CHAIR DICKEY: Right.

12          COMMITTEE MEMBER VENTURA: And my question was,  
13 how do researchers then confirm that that's a real  
14 legitimate phone number. And if something, a risk were to  
15 be identified --

16          VICE CHAIR DICKEY: Right.

17          COMMITTEE MEMBER VENTURA: -- and they need to  
18 contact the parent, do they have the right information.

19                 And Dr. Schleider, your response to that was -- I  
20 mean, we can't guarantee that the information provided at  
21 all is correct.

22          DR. SCHLEIDER: That's right.

23          COMMITTEE MEMBER VENTURA: So, I'm not sure, if  
24 that situation were to arise where there is risk identified,  
25 how do we know.

1           VICE CHAIR DICKY: And if they can't contact the  
2 parents --

3           COMMITTEE MEMBER VENTURA: That's right.

4           VICE CHAIR DICKY: -- what's the next step?

5           DR. SCHLEIDER: So, Kooth has their, and Soluna  
6 app have their own risk assessment response team. So, we  
7 would contact Soluna and let them know.

8           So, there are backup options for if we are unable  
9 to reach a parent. And if the information is correct, there  
10 is a circumstance in which we would not be able to reach the  
11 parent because they're not responsive.

12           So, this is the nature of any online study. We  
13 cannot guarantee with a hundred percent certainty that the  
14 information we receive is accurate, because we're not  
15 physically in the room with them. But I'm happy to look it  
16 up further. This is -- really, this is the (indiscernible)  
17 that's impossible to meet in an online study that's  
18 maximally inclusive to young people without, you know,  
19 incurring barriers to participation. That would be  
20 extremely exclusive to their ability to take part.

21           COMMITTEE MEMBER KURTURAL: Yeah. I feel like I  
22 need more information about the app in general. Just know  
23 what, you know, the family code and health and safety code  
24 kind of points on this issue. And I just need to see that  
25 contract to have a deeper understanding of how the app

1 works.

2 I mean it's -- I'm not -- they have access to the  
3 app, so that I mean that it makes sense that your user base  
4 that you're reaching out to is going to be the app users.

5 DR. SCHLEIDER: Yes.

6 COMMITTEE MEMBER KURTURAL: But I just want to,  
7 you know, know a little bit information on that contract  
8 because like in what was said and, you know, what was the  
9 purpose. It's just not enough information, I think for me,  
10 to move forward without.

11 DR. SCHLEIDER: I'm also trying to contact the  
12 member of the Soluna team that was meant to be here. But we  
13 were scheduled for 15 minutes from now to start. So, I do  
14 wish she were here to answer those questions right now, but  
15 I'll see if she's available.

16 COMMITTEE MEMBER LUND: I'm wondering, it sounds  
17 like this might be critical to you in determining whether or  
18 not you would be able to vote today, if we could pause until  
19 she could get somebody to answer those specific questions.

20 CHAIR HESS: Break, yeah.

21 VICE CHAIR DICKEY: Yeah.

22 CHAIR HESS: I was going to suggest that.

23 VICE CHAIR DICKEY: We need to give them that  
24 chance.

25 CHAIR HESS: So, would it help if we took like a

1 15-minute break and then staff from Soluna would be able to  
2 join? And then, we could continue the discussion when more  
3 of your team is present.

4 DR. SCHLEIDER: Sure, yeah, at least more of  
5 Soluna's team.

6 CHAIR HESS: Yes, yes. Okay, I think that  
7 everyone is on board with that. Okay, why don't we do that.  
8 Let's break for 15 minutes from now, so about 10:30, 10:32.

9 (Off the record at 10:17 a.m.)

10 (On the record at 10:32 a.m.)

11 CHAIR HESS: Welcome back, everyone. And I think  
12 we have some members of the Soluna team on board to continue  
13 the discussion and answer some of the questions that board  
14 members have had.

15 So, Dr. Ventura, do you want to --

16 COMMITTEE MEMBER VENTURA: Yes. So, we have some  
17 questions about the contract between Soluna and DHC --  
18 Department of Health Care Services.

19 COMMITTEE MEMBER KURTURAL: I can go ahead.

20 COMMITTEE MEMBER VENTURA: Yeah.

21 COMMITTEE MEMBER KURTURAL: I kind of -- because  
22 this is -- I haven't heard of this app before. So, and I  
23 wanted to know on the front end, front end, when you have  
24 someone, say, 15 sign up for the app, what type of -- how do  
25 you -- what type of screening occurs on the front end to

1 determine that the minor is mature enough to participate in  
2 the app. And if you could please expand upon that, that  
3 will be helpful to me.

4 MS. MISCH: Sure. First of all, you'll see that I  
5 put in the chat a link to CYBHI, so it's the Children Youth  
6 Behavioral Health Initiative, which is a statewide  
7 initiative under Governor Newsom's protocol, which started I  
8 believe in 2023. So, it is state funded.

9 And then, you'll also see the Soluna app website  
10 as well, too, which notes as a CalHOPE program. So, again,  
11 this is part of the wider initiative that's across  
12 California. And we started in 2024, January 2024.

13 You may have heard of -- oh, my goodness, now why  
14 am I blanking. BrightLife or BrightLine kids. They're also  
15 the other virtual behavioral health for caregivers, and then  
16 children under the age of 13.

17 So, Soluna is particularly designed to meet the  
18 behavioral health needs and support young people in  
19 California as a free app. The ages are between 13 and 25.

20 And we have a digital ecosystem. So, to start  
21 with, when someone decides to register for Soluna, they go  
22 through the app itself, which is actually anyone can  
23 download it via, you know, Apple, or what's it, Android.  
24 Everyone uses Android, right. You can download it either  
25 way and the registration process requires the age of the

1 young person. So, the age gates, to make sure that nobody  
2 too young or too old try to access, so with date of birth.

3 And then, secondly, it would be the zip code,  
4 again to make sure that they are within California. So, the  
5 expectation is with our standards and terms of privacy that  
6 they are being honest with that.

7 When they register, they have access first only to  
8 content and tools in which there is no interaction with a  
9 human. So, the content is literally articles, or some audio  
10 features. A lot of them look like -- you would -- it almost  
11 looks like you're scrolling through phone and looking at the  
12 conversation back and forth. That's like a graphic. And  
13 so, none of that is interfacing with a human person. It's  
14 all just content.

15 And in the tools, again, are things like some  
16 breath work types of activities. There is a Starboard,  
17 which is kind of like we call our digital fidget spinner  
18 because it's kind of neurodiverse. But there are tools that  
19 can be used by the individual that have no human  
20 interaction, they are just tools and content.

21 The next level up, which requires -- that would be  
22 guest user access. And if the young person's between 13 and  
23 25, then they can access the human interaction pieces of  
24 that. Which then, the next level would be coaching. And  
25 those coaching sessions are chat based.

1           We do also offer tele-coaching to those that  
2 prefer not to use the chat based. And we also have video  
3 coaching.

4           And with that particular, the sessions are done  
5 with a peer, a certified peer specialist who have gone  
6 through the California Certified Peer Specialist program,  
7 and all of that that entails. And so, those are chat based,  
8 tele-coaching or video coaching.

9           They are sub-clinical, so it is not with a  
10 licensed counselor. Although, we do have LCWs and licensed  
11 counselors that provide clinical oversight to our peer  
12 specialist team and are also available to get on those chats  
13 if there was a need to.

14          We have an extensive human moderated system in  
15 which all chats are moderated by a human to look for risk,  
16 and we have an extensive (indiscernible) protocol.

17          And then, in terms of the second way a young  
18 person might interact with a human or provide a little bit  
19 higher level -- not higher, but a little bit more extensive  
20 level of service would be through our peer community forum.  
21 And this is an opportunity in which the young person can  
22 either respond to a Soluna created poll or reflection.

23          And so, the polls are literally kind of like what  
24 you would expect, like in Zoom (phonetic), where there's a  
25 poll and they get to choose an answer. So, that's how they

1 respond that way.

2 Or there is a reflection item. So, it might be a  
3 question that the young person can respond to. Any of t  
4 hose responses are a hundred percent moderated by a human,  
5 peer specialist, or licensed counselor that are looking  
6 through those, and have an appropriate safeguarding if  
7 there's any concerns. As well as they aren't posted live  
8 until they are moderated.

9 And then, the next level would be the young people  
10 also have the opportunity to participate in an age-gated,  
11 peer community. And I believe the age on this, and don't  
12 quote me, I believe it's 13 to 17 and 18 and above. So, we  
13 do have two different peer communities where they can write  
14 their own content and post it. But again, before it posts,  
15 it's a hundred percent human moderated, where a human is  
16 looking at it, evaluating it for risk, making sure it's  
17 within our policy and protocol before it gets submitted.

18 That's kind of the levels in terms of direct.  
19 Off-platform, we also do have another piece of Soluna, which  
20 is our care navigation. And that is particularly for young  
21 people who are engaging in coaching and who have need to  
22 connect to other services, and they sign up to be able to do  
23 so via the app and connect with a live person to get  
24 connected to a service within their community, and do like a  
25 direct handoff. So, that's another level.

1           Also, just state that within the State of  
2 California, the legal age of consent to treat is 13 -- sorry  
3 -- yes, it's 13. We make we have our own privacy officer  
4 that in any state that we are in, we always make sure that  
5 we are recognizing that consent to treat.

6           So, a young person has the ability within this age  
7 bracket to consent to their own treatment.

8           But again, I want to just emphasize that the level  
9 of treatment here is coaching and that's with a peer  
10 specialist. It's not with a licensed clinical counselor,  
11 like you would expect in a traditional setting.

12           So, I know that's a lot of information to throw  
13 your way. And I can definitely follow up with the specific  
14 contract. We've been working with Autumn and her team for  
15 quite some time at the Department of Health Care Services.  
16 We meet with them on a monthly basis. It's very well  
17 monitored.

18           And you'll see that Dr. Schleider has a approval  
19 letter from DHCS, specifically, and it cites that they have  
20 reviewed the project, we've met with them several times,  
21 they are well aware of this. And they are very much in  
22 favor of having this additional evaluation done by an  
23 external expert in the field of single-session interventions  
24 in order to be able to get an unbiased assessment of the  
25 impact that Soluna is making for young people within

1 California.

2 COMMITTEE MEMBER KURTURAL: And is there any way  
3 in the screening process in the front end to track if  
4 someone lacks capacity to engage with a human? Lacks  
5 capacity, you know, to receive any sort of coaching  
6 services?

7 MS. MISCH: And by lacks capacity, can you tell me  
8 a little bit more what you mean in terms of are we talking  
9 age, are we talking developmental --

10 COMMITTEE MEMBER KURTURAL: Not age. Talking  
11 development. Because I understand the age cutoff is, you  
12 know, 13 and higher. So, I'm not concerned about that  
13 because there is a way for them to receive services if it  
14 elevates to that level.

15 I'm talking about if someone has, yeah, a  
16 developmental disability or an intellectual disability, you  
17 know, what is done to assess that?

18 MS. MISCH: So, the contract with DHCS which,  
19 again, I think I can definitely follow up and see what we  
20 could share specifically, does require that it would be free  
21 to anyone who is 13 to 25. So, there is no gating in terms  
22 of developmental. There's no expectations around that.

23 Again, I want to emphasize that this is sub-  
24 clinical. So, the types of tools and information that's  
25 being provided would not be at a therapeutic level,

1 especially within the content and the tools. So, it would  
2 very well probably be developmentally appropriate.

3 COMMITTEE MEMBER KURTURAL: Okay. I'm just trying  
4 to wrap my head around this.

5 MS. MISCH: And I wonder if, particularly for the  
6 Northwestern evaluation, Jessica, if we've spoken to  
7 anything that you have in terms of the level of consent and  
8 any kind of appropriateness. Because I think that might be  
9 more of a concern. The app is going to be what the app is  
10 going to be.

11 COMMITTEE MEMBER KURTURAL: Uh-hum.

12 MS. MISCH: Because of our contract requirements,  
13 that we can't change.

14 DR. SCHLEIDER: That was our reason for including  
15 the capacity to, you know, understand the assent form, that  
16 those are meant to identify whether somebody has the  
17 comprehension to be able to take part in the study.

18 But they're -- per the state's requirements, the  
19 app must be available to all young people per criterion.

20 COMMITTEE MEMBER KURTURAL: And one of the things,  
21 Jessica, that you talked about was the fact that through the  
22 app that if there was a sort of risk situation, where the  
23 parents had to be notified because there was some sort of  
24 mention of suicide ideation, what -- so, what's the sort of  
25 policies, you know, on the app side of handling this.

1 DR. SCHLEIDER: Sure. So, on the app, I think  
2 Gina is better positioned to speak to that.

3 COMMITTEE MEMBER KURTURAL: Yeah.

4 DR. SCHLEIDER: It's first identified in the  
5 Qualtrics survey, then in the protocol that we outlined in  
6 the proposal that we submitted that apply. But Gina, if you  
7 could speak to the within app --

8 MS. MISCH: Yeah, which I'm not sure -- I mean I  
9 can talk about that, but I'm not sure it's as pertinent as  
10 the study itself.

11 DR. SCHLEIDER: I agree. It's just there were  
12 questions about those.

13 MS. MISCH: Yeah, so let me start with we  
14 absolutely, if it's helpful, can follow up in terms of  
15 pulling out that specific safeguarding policy that we have  
16 with Northwestern, because I realize that there's a lot of  
17 materials and we want to make sure that everybody  
18 understands that policy.

19 I can also provide the safeguarding policy that we  
20 have in terms of the app itself and what we categorize as  
21 risks, and then what the specific action is. Which is  
22 usually signposting to a service, depending on the level of  
23 risk. And, of course, mandated reporting, then that's  
24 required, right, and so we do have a process for mandated  
25 reporting.

1 COMMITTEE MEMBER KURTURAL: Okay. All right, I  
2 don't have any further questions on the app side.

3 MS. MISCH: These are really great questions,  
4 though, and I really appreciate this concern. You sure were  
5 snaking through things.

6 I also just want to encourage; I hope that you'll  
7 connect on the website that I provided for the Soluna app.  
8 We also have another one, the solunaapp.com/impact. If  
9 you're looking for printed materials and you're just wanting  
10 to learn more about the Soluna app, that's a great place to  
11 go.

12 COMMITTEE MEMBER KURTURAL: Thank you.

13 COMMITTEE MEMBER VENTURA: Are there any other  
14 comments from Committee members, after reviewing all of the  
15 application material?

16 VICE CHAIR DICKEY: I guess the question that I'm  
17 -- children who are wards, do you have a special way to deal  
18 with them? You know, who are not with their parents, but  
19 are wards of the court? Or would you have a way of  
20 identifying them?

21 DR. RYKACZEWSKA: You're muted, Dr. Schleider.

22 DR. SCHLEIDER: Sorry. We would ask them to  
23 provide a phone number for a caregiver or a guardian, so not  
24 necessarily a parent but whoever is identified as their  
25 legal guardian.

1           So, if somebody doesn't -- is not placed with  
2   their bio parents, then that's the phone number we would  
3   request from them.

4           COMMITTEE MEMBER LUND: But your question is a  
5   good one, Dr. Dickey, because that's a little bit different.

6           VICE CHAIR DICKEY: Slightly different, yeah.

7           COMMITTEE MEMBER LUND: Wards of the court is a  
8   special circumstance. And my understanding is that they  
9   have to have permission from the court to participate. They  
10   can't just assent.

11          VICE CHAIR DICKEY: That's my understanding, too.  
12   I'm reading the OHRP guidance.

13          DR. SCHLEIDER: Would they be able to access  
14   Soluna, thought?

15          VICE CHAIR DICKEY: Yeah, they would. The  
16   question is could they consent to be involved in the  
17   research.

18          COMMITTEE MEMBER LUND: Yeah, if they're wards of  
19   the court they're in the general population, but they are --  
20   they're not incarcerated, so they would be able to access  
21   the app the same way anyone else in that age group would be  
22   able to access it.

23          CHAIR HESS: But they'd have to be -- effectively,  
24   they'd have to be excluded from the study.

25          COMMITTEE MEMBER LUND: Correct.

1 CHAIR HESS: Okay.

2 VICE CHAIR DICKY: Yeah, that's --

3 CHAIR HESS: Screened out.

4 DR. SCHLEIDER: Okay. That's the way we have it

5 set up now, in order to achieve a representative sample of

6 Soluna app users, we don't ask about that particular --

7 about that.

8 VICE CHAIR DICKY: But I think the --

9 MS. MISCH: Would there be a possibility of being

10 able to add -- I think, Jessica, you've got gating on there

11 in terms of the caregiver, of adding in something in terms

12 of being able to further define who the caregiver is, and so

13 that if it happened --

14 DR. SCHLEIDER: Definitely can. Yeah, that's not

15 a problem at all.

16 VICE CHAIR DICKY: Yeah, I think, because the

17 rule says that they have to have an advocate appointed by

18 the court.

19 DR. SCHLEIDER: Okay.

20 VICE CHAIR DICKY: And it can't just be the

21 guardian.

22 DR. SCHLEIDER: Okay.

23 VICE CHAIR DICKY: So, if there's a way you could

24 add that into your screening -- or questions, give us the

25 name of, you know, a parent to contact, and are you a ward

1 of the court or something like that.

2 COMMITTEE MEMBER LUND: Yeah, I think if there was  
3 a way in the screening to basically make wards of the court  
4 ineligible for the study, because they -- it's not just that  
5 the advocate would have to give permission, my understanding  
6 is that the court, itself, would have to give permission.

7 VICE CHAIR DICKY: It doesn't say that here. But  
8 I don't think you'll want to go through the process of  
9 getting an advocate.

10 COMMITTEE MEMBER LUND: Yeah.

11 VICE CHAIR DICKY: So, I think you just want to  
12 exclude them.

13 COMMITTEE MEMBER LUND: Yeah, I agree.

14 DR. SCHLEIDER: Exclude, okay. That's not a  
15 problem at all, I would just need to know the exact wording  
16 that we'd be asked to use, and we can include that as  
17 another exclusionary criteria without any issue.

18 COMMITTEE MEMBER VENTURA: Okay. We'll work on --  
19 we'll provide you the wording as the exclusion criteria for  
20 the screener?

21 DR. SCHLEIDER: Okay.

22 COMMITTEE MEMBER VENTURA: Were there any other  
23 comments? One minor thing is that in the flyer there is a  
24 statement that, "No foreseeable risk associated with the  
25 project." I think I would feel comfortable if it was at

1 least minimal risk because there is potential for loss of  
2 confidentiality --

3 DR. SCHLEIDER: Okay.

4 COMMITTEE MEMBER VENTURA: -- and sensitive  
5 questions being asked and just kind of, you know, feelings  
6 around that. I know you say that uncomfortable questions  
7 might be -- they might feel uncomfortable answering some of  
8 the questions, but if it could just be minimal. I think  
9 that was kind of a minor point.

10 DR. SCHLEIDER: Sure.

11 COMMITTEE MEMBER VENTURA: But the more important  
12 thing is exclusion for the screener for wards of the court.

13 Is there anything else major that I may have  
14 missed, or Carrie?

15 COMMITTEE MEMBER KURTURAL: Okay, so we have a  
16 cohort, my understanding it's 250 to 500 is what the goal  
17 is. So, that denominator is pretty low, you know, in  
18 comparison.

19 We have protection against small -- I'm sure  
20 you're going to public, right. And you're willing to  
21 suppress any numbers under five. But you are asking very  
22 granular information about gender identity, sexual  
23 orientation, and other things like that. And so, I'm  
24 thinking that that number needs to be higher.

25 DR. SCHLEIDER: Sure, we're happy to adhere to

1    whatever the --

2                   COMMITTEE MEMBER KURTURAL:  And, actually, and I  
3    know I see Dr. Ventura's note here, no cell size plus than  
4    11.

5                   But because the denominator is going to be so low  
6    on this, 250 to 500, I actually suggest using the CalHHS de-  
7    identification guidelines.

8                   DR. SCHLEIDER:  Okay.

9                   COMMITTEE MEMBER KURTURAL:  Because just so many  
10   granular questions in your survey.  And we're happy to  
11   provide a copy.  It's a way to statistically mask that's a  
12   little more of a -- I don't know, it's a more scrutinized  
13   process than just I'm going to mask anything under 11.

14                  And it might be helpful for this one because it's  
15   just, you know, I'm sure you're going to want to publish on  
16   demographic information and all of that, so.

17                  DR. SCHLEIDER:  No problem at all to follow this.  
18   That's very helpful to know.  I'd love to receive a copy of  
19   those guidelines.

20                  COMMITTEE MEMBER KURTURAL:  Okay.

21                  MS. MISCH:  Dr. Schleider, I can work with you on  
22   that.  But actually, as part of what we would be requiring  
23   as well, too, and have talked through that with DHCS.  In  
24   particular I worked for a very long time in terms of  
25   projects that data de-identification guidelines and know the

1   scoring rubric on that, we'd be very much able to do that.  
2   I was part of implementing these within San Diego County,  
3   when I was there at UCSD.

4               So, I've actually got a copy of the guidelines  
5   right in front of me to ensure those -- we would make sure,  
6   because this would be important to do, when we're also  
7   publishing a manuscript, as well as a report, to use those  
8   guidelines would supersede anything, and they're just more  
9   rigorous, and careful in terms of the small numbers. But  
10  also, with the way things are shared out in terms of  
11  demographics, more region, there's just some granularity  
12  there that we know really well.

13              COMMITTEE MEMBER KURTURAL: Great.

14              DR. SCHLEIDER: That'd be great, thank you, Gina.

15              CHAIR HESS: Did we want to request that they  
16  change the request form to assent.

17              COMMITTEE MEMBER VENTURA: Assent, yes.

18              CHAIR HESS: And are there any other changes to  
19  the assent form that we --

20              COMMITTEE MEMBER VENTURA: No, got that, have  
21  noted. Oh, well, we're going to make the -- so, they're  
22  going to make the language. Should I make the motion or --

23              CHAIR HESS: No, we can talk about it, because  
24  maybe it was just more detail.

25              COMMITTEE MEMBER VENTURA: It is, so more detail

1 on like what --

2 CHAIR HESS: Exactly how the data's going to be  
3 used and what the project is, yeah.

4 COMMITTEE MEMBER VENTURA: Yeah, yeah. So, more  
5 detail on that. But also keeping the grade level  
6 appropriate. You said it was high.

7 CHAIR HESS: Yeah.

8 COMMITTEE MEMBER VENTURA: I checked most of it.  
9 I thought it was eighth grade, but I'll check the entire T  
10 of the assent form.

11 CHAIR HESS: I mean with adults we would want  
12 eighth grade. But I think with this age group we may even  
13 want younger, like sixth grade.

14 COMMITTEE MEMBER VENTURA: Sixth grade?

15 CHAIR HESS: Yeah.

16 COMMITTEE MEMBER VENTURA: Okay.

17 COMMITTEE MEMBER LUND: These are 14- to 17-year-  
18 olds. I mean, they will have barely cleared eighth grade by  
19 age 14 so --

20 COMMITTEE MEMBER VENTURA: So, even younger, okay.

21 CHAIR HESS: With the caveat that we understand  
22 that that may -- that's the goal. But it is sometimes  
23 difficult to achieve that in a consent form, while still  
24 communicating --

25 COMMITTEE MEMBER LUND: What you need to.

1 CHAIR HESS: -- the information. So, we should  
2 make it clear that that's like if -- get it as low as you  
3 can.

4 COMMITTEE MEMBER LUND: And there are really good  
5 references online for assents. Remember, it's an assent  
6 form, not a consent form. So, you have a little more  
7 latitude in an assent form in terms of, you know, explaining  
8 things. And the language can be very basic.

9 COMMITTEE MEMBER VENTURA: Okay.

10 VICE CHAIR DICKEY: So, is that something she  
11 could review?

12 CHAIR HESS: Uh-hum.

13 COMMITTEE MEMBER VENTURA: Yes.

14 COMMITTEE MEMBER LUND: And I just want to say, I  
15 think that the idea of having the quiz is a great one,  
16 right. Because it's a way of knowing that they actually  
17 read the form, which a lot of times we don't know if they  
18 actually do. They read the form, and they actually  
19 understand the material that was presented to them before.  
20 So, I think that that's a great idea.

21 CHAIR HESS: Do we have a copy of the quiz, the  
22 questions?

23 COMMITTEE MEMBER VENTURA: Yes. It's all in the  
24 one, the Qualtrics survey document, .pdf, it's 54 pages.  
25 So, it's everything from the flyer to the consent -- will be

1     assent, the quiz questions.

2             And I believe, Dr. Schleider, if they get a  
3     certain number wrong on the quiz, they get kicked back.  
4     They have to reread the form, the information, and then take  
5     the quiz again.

6             DR. SCHLEIDER:   Correct.

7             COMMITTEE MEMBER VENTURA:   I think they have two  
8     tries or -- is it two?   Okay, I did read that correct.

9             DR. SCHLEIDER:   They have two chances, yes.

10            COMMITTEE MEMBER VENTURA:   Two chances to pass the  
11     quiz, to make sure they absorb the information, and then  
12     proceed.   Okay.

13            CHAIR HESS:   If you're ready to make a motion?

14            COMMITTEE MEMBER VENTURA:   Okay.   Is it deferred  
15     or conditional approval?

16            VICE CHAIR DICKEY:   Deferred.

17            COMMITTEE MEMBER VENTURA:   Deferred, okay.

18            So, I'll make the motion for deferred approval --

19            VICE CHAIR DICKEY:   One year.

20            COMMITTEE MEMBER VENTURA:   -- one-year, minimal  
21     risk, with the conditions that they will make the following  
22     revisions.

23            One, making -- changing the consent/assent form to  
24     be assent only.

25            I'm just going to wait.   Two, in the assent form

1 include more explanation about how their data will be used  
2 and what -- and details about what is expected if they  
3 participate.

4 Also, lowering the grade level, reading level as  
5 low as possible. Sixth grade is the target, but just  
6 simplify language as much as possible.

7 The other, in the screening criteria there will be  
8 exclusion for -- to identify wards of the court -- or wards  
9 of the state.

10 VICE CHAIR DICKY: Wards of the court.

11 COMMITTEE MEMBER VENTURA: Wards of the court,  
12 okay.

13 DR. SCHLEIDER: Is that the exact language we  
14 should use?

15 COMMITTEE MEMBER VENTURA: Yes.

16 DR. SCHLEIDER: Okay. Okay, not a problem.

17 COMMITTEE MEMBER VENTURA: And then, finally, will  
18 revise the masking -- data masking to align with the CalHHS  
19 data de-identification statistical masking.

20 DR. RYKACZEWSKA: Data statistical masking or --

21 COMMITTEE MEMBER LUND: To align with the data de-  
22 identification guideline.

23 DR. RYKACZEWSKA: Okay, just align with the data  
24 de-identification guidelines.

25 VICE CHAIR DICKY: Well, actually, the wards of

1 the state --

2 COMMITTEE MEMBER LUND: It is wards of the state.

3 VICE CHAIR DICKY: -- or other agency.

4 COMMITTEE MEMBER KURTURAL: I wonder, do they use

5 wards of the state or dependencies?

6 VICE CHAIR DICKY: I don't know.

7 COMMITTEE MEMBER LUND: Are you looking at OHRP?

8 VICE CHAIR DICKY: Yeah.

9 DR. RYKACZEWSKA: Should we follow up to confirm

10 the language from CPHS?

11 VICE CHAIR DICKY: Yeah.

12 DR. RYKACZEWSKA: Just to give us more time to

13 confirm the exact language we're looking for.

14 VICE CHAIR DICKY: Yeah, whether it's wards of

15 the state or wards of the court.

16 MS. MISCH: Yeah, I'd love that. Being a former

17 ward of the state, as a foster child, I'd love to get some

18 recommendations on how we would word that for a sixth grade

19 reading level, too. If we did have a young person, and

20 would they necessarily know what that meant.

21 VICE CHAIR DICKY: Yeah.

22 MS. MISCH: And then, I know that this is also a

23 concern when it ends up when -- I think we just want to make

24 sure we delineate foster care, and sometimes you also have a

25 caregiver that's -- they're in foster care, but it's a

1 caregiver that's a family member, and making sure that we --

2 COMMITTEE MEMBER KURTURAL: Oh, yeah.

3 MS. MISCH: -- are thinking about all of those.

4 And that we translate that, I think, to the best of our

5 ability so that it's clear in the assent form.

6 CHAIR HESS: Is there a distinction, really,  
7 between a foster -- a child who's in foster care, and a  
8 child who's in foster care, but the foster caregiver is  
9 family?

10 COMMITTEE MEMBER KURTURAL: It's all a whole  
11 separate area of law.

12 CHAIR HESS: Okay.

13 COMMITTEE MEMBER KURTURAL: That, admittedly I've  
14 never practiced in. But I have plenty of friends that have  
15 practiced in this area. And, yet it is a legal  
16 determination that you are a ward of the court.

17 But I also remember dependency being used. And  
18 so, how about this, we can follow up on that and then I'm  
19 happy -- I'm willing to serve on a subcommittee for this.

20 COMMITTEE MEMBER VENTURA: Thank you, yes.

21 COMMITTEE MEMBER KURTURAL: If you want me to kind  
22 of figure out and help you guys navigate this one on that.

23 DR. SCHLEIDER: That would be great, because I  
24 worry that even foster youth fall in their category, if  
25 they're 14 may not recognize that term.

1 COMMITTEE MEMBER KURTURAL: Oh, yeah. Yeah, yeah,  
2 me, too.

3 DR. SCHLEIDER: So, I wouldn't trust their  
4 responses to be accurate.

5 COMMITTEE MEMBER KURTURAL: Oh, yeah. Yeah.

6 DR. SCHLEIDER: So, it would be great if we could  
7 have an add on that we could write.

8 CHAIR HESS: Does an assent form need to contain  
9 the actual term, though, and then can have a subsequent  
10 explanation. So, are you currently a ward of the court or  
11 state? By that, we mean--

12 COMMITTEE MEMBER KURTURAL: That might be -- you  
13 know, we'll look at the Common Rule. Let me go ahead and  
14 talk with someone who's experienced in this area, and in a  
15 subcommittee, and then we can figure out what will work for  
16 this one.

17 VICE CHAIR DICKY: Yeah.

18 COMMITTEE MEMBER KURTURAL: Because, you know, I  
19 am concerned of a child not knowing what that means.

20 VICE CHAIR DICKY: Yeah. And I'm not absolutely  
21 sure that they can't be included in the research, or they  
22 absolutely have to have an advocate. But it's gray enough,  
23 it looks like it's something we should look into.

24 COMMITTEE MEMBER KURTURAL: Yeah, I just think we  
25 have to follow up on that. Thank you for raising it, Dr.

1 Dickey, because it -- I wasn't even thinking of that.

2 DR. SCHLEIDER: I also appreciate you raising  
3 that. It's never -- we've done so many studies with  
4 parental consent readers, and nobody's ever asked that  
5 question before.

6 CHAIR HESS: Yeah.

7 DR. SCHLEIDER: So, I really am grateful that you  
8 brought it up, because I know I have to look into it  
9 further.

10 COMMITTEE MEMBER VENTURA: Okay. That concludes  
11 my motion.

12 COMMITTEE MEMBER LUND: Okay. And did you move to  
13 have a subcommittee with the two of you?

14 COMMITTEE MEMBER VENTURA: Oh, yes, with a review  
15 of a subcommittee by myself and Ms. Kurtural.

16 DR. SCHLEIDER: Thank you all so much.

17 CHAIR HESS: So, a second. Do we have a second?

18 VICE CHAIR DICKEY: Second.

19 CHAIR HESS: Okay.

20 MS. ATIFEH: Dr. Johnson?

21 COMMITTEE MEMBER JOHNSON: Approve.

22 MS. ATIFEH: Ms. Kurtural?

23 COMMITTEE MEMBER KURTURAL: Approve.

24 MS. ATIFEH: Ms. Lund?

25 COMMITTEE MEMBER LUND: Approve.

1 MS. ATIFEH: Dr. Palacio?

2 COMMITTEE MEMBER PALACIO: Approve.

3 MS. ATIFEH: Dr. Ruiz?

4 COMMITTEE MEMBER RUIZ: Approve.

5 MS. ATIFEH: The motion passed.

6 CHAIR HESS: Okay. Thank you to the researchers,  
7 thank you to Dr. Ventura. You'll be receiving probably  
8 quite a bit of communication from CPHS members prior to  
9 receiving a letter. So, thank you.

10 MS. MISCH: Thank you so much for this. And I  
11 also just wanted to do a shout out for Angelique (phonetic),  
12 who's been amazing working with Northwestern, and to Soluna  
13 in the whole process. We've both said that the customer  
14 care that we've received and just the navigating through  
15 this process has been probably one our most amazing  
16 bureaucratic experiences. So, hats off to Angelique in  
17 particular, but then to all of you. Really appreciate this.

18 CHAIR HESS: Thank you. Okay, I guess we move on  
19 to public --

20 DR. RYKACZEWSKA: Items H through P.

21 CHAIR HESS: Okay, are they --

22 COMMITTEE MEMBER VENTURA: Sorry, Dr. Hess.

23 CHAIR HESS: Yes.

24 COMMITTEE MEMBER VENTURA: Was there supposed to  
25 be room for public comment on that protocol?

1 VICE CHAIR DICKEY: Oh, yes.

2 CHAIR HESS: Yeah, can we take public comment  
3 after a motion, probably?

4 DR. RYKACZEWSKA: I think so.

5 CHAIR HESS: Thank you, actually, Dr. Ventura.  
6 So, is there any public comment from any members  
7 of the public who are present on the project just discussed?

8 DR. RYKACZEWSKA: If you could please raise your  
9 virtual hand, if you're on Zoom? And I do not believe we  
10 have an in-person attendees. I am not seeing any public  
11 comment.

12 MR. ZADROZNA: Yeah, there's no comments in  
13 person.

14 DR. RYKACZEWSKA: Thank you.

15 CHAIR HESS: Okay, thank you.  
16 Okay, is there public comment on Items H through  
17 P?

18 COMMITTEE MEMBER LUND: Actually, I have a comment  
19 that I think falls somewhere in H through P.

20 CHAIR HESS: Okay.

21 COMMITTEE MEMBER LUND: And I just wanted to bring  
22 it to the board and ask, perhaps, if we could make time on  
23 the agenda at future meetings to have a board discussion.  
24 And this is specifically about IPA reviews, but it may  
25 occasionally come up for us for Common Rule reviews. And I

1 know that we're not talking about the regulations package  
2 here.

3           What I am concerned about is that our IPA reviews  
4 very often involve datasets that have PII attached to  
5 information that may be criminalized by the current  
6 administration or in some states.

7           For example, medical record information that might  
8 involve reproductive health care, and specific kinds of  
9 procedures that people have received.

10           Immigration status and status as a nonbinary or  
11 transgender individual.

12           This is in many of our state datasets. And we are  
13 sometimes asked to approve these datasets to go to out-of-  
14 state researchers, in states that are now passing laws that  
15 criminalize some of these behaviors, that can be discovered  
16 in these datasets.

17           And I'm just really, really concerned about this.  
18 Really concerned.

19           VICE CHAIR DICKY: Wasn't there something, a  
20 directive we got --

21           DR. RYKACZEWSKA: For abortion there is a law that  
22 passed and is in effect, in terms -- instructing IRBs to  
23 consider when abortion-related data is released to out-of-  
24 state, to take that into consideration.

25           VICE CHAIR DICKY: That's a California law.

1 DR. RYKACZEWSKA: That is a California law, yes.

2 VICE CHAIR DICKY: So, there is that for  
3 abortion.

4 COMMITTEE MEMBER LUND: So, but I am now -- I am  
5 just looking at what's happening nationally. I'm really  
6 worried about these other kinds of data and how they might  
7 be weaponized against specific individuals.

8 Especially in light of the fact that the current  
9 administration does not seem to have any regard for data  
10 privacy and that with the changes that are happening so  
11 rapidly, I don't think that we can anticipate funding to  
12 university. Federal funding is being weaponized to try to  
13 get universities to do things.

14 And if the federal government were to threaten to  
15 withhold funding from universities if they don't turn over  
16 data, I don't know what might happen.

17 I mean, I'm just expressing that as a citizen and  
18 a person who's very concerned about these data.

19 So, I would like if the board, if anyone else  
20 shares my concerns, to have a discussion about what we might  
21 do with these kinds of reviews. Should we be requiring  
22 certificates of confidentiality for these kinds of datasets,  
23 when they're going to go out of state?

24 Should we be asking for assurances from the  
25 universities, in which the data will be housed, that they

1 will not be releasing record level data, you know, if we  
2 allow them to hold it.

3 So, anyway.

4 COMMITTEE MEMBER VENTURA: With certificates of  
5 confidentiality, as you said --

6 COMMITTEE MEMBER LUND: Uh-hum.

7 COMMITTEE MEMBER VENTURA: -- can that still, I  
8 mean legally, like if it were subpoenaed, or whatever the  
9 terminology is --

10 COMMITTEE MEMBER LUND: So, the current rule --  
11 the current rule around NIH certificates of confidentiality  
12 is that it -- the data are protected from being compelled  
13 through court order or other law enforcement means.

14 However, the data still fall under any legislative  
15 requirements, like child abuse reporting, or elder abuse  
16 reporting, and so on and so forth.

17 So, the researcher is a -- if the state law  
18 requires the researcher is a mandated reporter of child  
19 abuse, but a court cannot subpoena the records in a child  
20 abuse case. If that helps.

21 COMMITTEE MEMBER VENTURA: Okay.

22 DR. RYKACZEWSKA: I just want to note, for the  
23 purposes of ensuring that we are adhering to the Bagley-  
24 Keene Open Meeting Act, this item is not on the current  
25 agenda, so we cannot as a board discuss it right now. But

1 acknowledging the request to add it to a future agenda.

2 COMMITTEE MEMBER LUND: Yes, that's the whole  
3 purpose. I understand that we're not having the discussion  
4 today, or making decisions, or action items today. But my  
5 request was that if the board agrees, I would really like to  
6 have this discussion at a future meeting.

7 VICE CHAIR DICKY: I think it would also be good  
8 to involve legal counsel.

9 COMMITTEE MEMBER LUND: Yes, absolutely.

10 VICE CHAIR DICKY: Because there may be other  
11 laws that are relevant.

12 COMMITTEE MEMBER VENTURA: I would like -- like  
13 similar to how they prepare kind of like information sheets  
14 for the Committee members, if we can ask Jared, or whomever,  
15 to also have some information ready for us as far as how to  
16 deal -- like understanding, you know, certificates of  
17 confidentiality, if we require that, and all that entails.

18 DR. RYKACZEWSKA: Absolutely, that request is also  
19 received.

20 CHAIR HESS: Are there any other public comments?

21 MR. ZADROZNA: There's no public comments in  
22 person.

23 DR. RYKACZEWSKA: And I am not seeing any public  
24 comments on the virtual attendees.

25 CHAIR HESS: Okay. Any public comments on items

1 that were not on today's agenda?

2 DR. RYKACZEWSKA: If you would like to raise your  
3 virtual hand, please do so now.

4 I am not seeing any virtual hands. Nick, any  
5 other public comments on the room?

6 MR. ZADROZNA: No public comments in person.

7 CHAIR HESS: Okay. We just want to acknowledge  
8 that we received 14 public comments, which should be  
9 available to the public. And they've all been  
10 (indiscernible) and available to the public at this point.

11 So, with that, our next meeting will be on April  
12 25th, 2025.

13 And I guess we can go ahead and adjourn at 11:13.

14 (Thereupon, the meeting was adjourned at  
15 11:13 a.m.)

16 --oOo--
