

**California Health & Human Services Agency  
Center for Data Insights and Innovation  
Data Exchange Framework Implementation Advisory Committee and Data Sharing Agreement (DSA) Policies and  
Procedure (P&P) Subcommittee Meeting  
Q&A Log (9:00 AM – 11:30AM, May 15, 2025)**

The following table shows comments that were entered into the Zoom Q&A by public attendees during the May 15, 2025 meeting:

Count	Name	Comment	Response(s)
1	DeeAnne McCallin	What other counties has CDII been to other than Alameda and Sacramento? Acknowledging awareness of San Diego being one of the other six mentioned.	San Diego, San Francisco, Santa Clara & San Mateo.
2	Lisa Nelson	Chat is disabled and there doesn't appear to be a way to unmute, so the presenter won't get anyone speaking up. Our only option for audience participation is to place questions in the Q&A	Chat is available for panelists and disabled for members of the public. Members of the public can use the Q&A. There will also be a public comment period at the conclusion of the meeting where members of the public can speak
3	Julie Silas	Would be important to be careful about what is happening at the federal level to ensure that their efforts on standards are protective of individual privacy, given some of the data efforts coming out of the federal administration this year and how private information entered for one purpose is then being used for another purpose at the expense of individuals (e.g. IRS data and Immigration status) - this is really an obvious comment but just wanted to say it.	Thank you, Julie.

4	Lucy Johns	When mentioning national directories (and networks), don't forget, along with eHealth and CeQ, DirectTrust. California coverage is pretty broad. ;-)	Thank you, Lucy.
5	Susan Houck-Clark	FYI DirectTrust Directory is another well established directory. <a href="https://directorysearch.directtrust.org/directtrust.org">https://directorysearch.directtrust.org/directtrust.org</a>	Thank you, Susan.
6	Lucy Johns	As a consumer, I would think consent is specific to my situation in real time. If goal is one consent form, centrally available, what is the time frame for such consent and where does it start, i.e. who starts the ASCMI (is that right?) process?	The workflows for capturing and accessing a individual's consent are still under development, but we'll touch on some thoughts here at a high level in the coming slides.
7	Lucy Johns	Could public see who is speaking?	
8	Lucy Johns	Id matching...right. ;-). Not solved 100% in health info exchange after decades. ;-)	Thanks for your comment, Lucy.
9	Dee Anne McCallin	the 31% of grantees who have achieved Milestone 2 would be a good cohort to explore the Participant Directory conversation further.	
10	Lucy Johns	There's a long history in CA of including "consumers" as a class to be represented on committees that create policy that could/will affect their lives. (Eg: health care and services; social care and services.)  Disappointed not to see this ground-up input being solicited for short-term future of DxF development.	
11	Susan Houck-Clark	I will be facilitating a panel with 4 QHIOs for the California Health Information Association on June 2 to	

		assist with the communication to front line users.
