

**California Health & Human Services Agency  
Data Exchange Framework Technical Advisory Committee (TAC) Meeting  
Chat Log (12:00 PM – 1:00 PM PT, September 18, 2025)**

**The following comments were made in the Zoom chat log by Members of the TAC and staff during the September 18, 2025, meeting:**

15:14:33 From Eric Nielson to Everyone:

Julie, i think that's a referral

15:16:16 From Eric Jahn to Everyone:

should be "receive event asynchronously pushed from Sources"

15:16:54 From Eric Jahn to Everyone:

a suicide prevention hotline could use real-time

15:17:23 From Eric Jahn to Everyone:

DV is another example

15:18:01 From Michael Marchant to Everyone:

is real time a requirement for all participants - ADT from certified EHRs make sense - how would that work with other org types and technologies

15:18:04 From Rim Cothren, HCAI DxF to Everyone:

Thanks, Eric. Please feel free to make this comments verbally for all others to hear.

15:22:07 From Ray Duncan to Everyone:

@EricJahn thanks for pointing out the suicide prevention line

15:26:48 From Julie Silas to Everyone:

Will this be open source so that small nonprofits can participate and receive notifications?

15:30:06 From Ray Duncan to Everyone:

I just think we need to be cautious with our use of "real time" as a general requirement across the entirety of DXF which has such a broad range of envisioned participants - some participants don't really need real-time, some don't have the technology to send events in real time or to receive notifications in real time. Softening the language where appropriate would help participants feel comfortable with their level of participation.

15:35:46 From Eric Jahn to Everyone:

@Julie Open source would be great. Also, Direct Secure Messaging email for social services providers would be a readily available means for small organizations to receive message.

15:35:57 From Rim Cothren, HCAI DxF to Everyone:  
Catalina: Let's pull down the slides for a while.

15:42:41 From Eric Jahn to Everyone:  
Direct Secure Messaging (email) is now gaining the ability to convey FHIR resources (like maybe Gravity's). <https://directtrust.org/blog/socialcare-on-fhir-over-direct/%E2%80%8B>

15:56:39 From Ray Duncan to Everyone:  
I hope that at the end of the day, realistic timeframes will be laid out for implementation of this architecture at the node level and at a later date for all categories of participants. The original deadlines for the fully operational DXF at the QHIO level or participation in DXF by organizations were not realistic, I hope we can do better going forward. It's not helpful and harms our credibility to set deadlines for compliance that are not achievable.
